AUCTION TERMS

This is a mail bid auction conducted by **Classical Numismatic Group, Inc. (CNG)**. Bidding in the auction constitutes acceptance of the following terms:

1. The property listed in this catalogue is offered for sale by CNG for itself and as agent for various owners and other consignors. We reserve the right to reject any bid, to determine the opening price, to set bidding increments, to vary the order of the auction, to reopen bidding in the case of a dispute, to withdraw any lot, to bid on behalf of CNG, to bid on behalf of the consignor, and to permit the consignor to bid on his own lots. CNG may loan or advance money to consignors or prospective bidders, and may have an interest other than commission charges in any lot. CNG may bid on its own account as an "insider" with information not available to the public.

2. A **15% Buyer's fee** will be added to the hammer price.

3. All coins are guaranteed genuine. Attribution, date, condition, and other descriptions are the opinion of the cataloguer, and no warranty is expressed or implied. **Please note that an auction sale is not an approval sale.** Lots examined prior to the sale and lots purchased by floor bidders (including bidders executing commission bids on behalf of other parties) may not be returned for any reason except lack of authenticity. All claims of misdescription and all claims of return, except claims regarding authenticity, must be made within 5 days of receipt of material. Any claim of lack of authenticity must be made in writing by the original purchaser immediately after discovery that an item is not authentic, and upon making such a claim the original purchaser must immediately return the lot to CNG in the same condition as at the time of the auction. Coins that have been encapsulated ("slabbed") by a grading and/or authentication service may not be returned for any reason, including authenticity, if they have been removed from the encapsulation ("slab"). If payment is made by credit card, rights of return are governed by these Auction Terms which supercede any rights of return promulgated by the card issuer. Estimates are intended as a guide only and not as a statement of opinion of value.

4. Invoices are due and payable immediately upon receipt. Interest and late fees of 2.0% per month, or at the highest rate permitted by law, whichever is less, from the date of the auction, shall be payable on invoices not settled within 30 days of the auction date. Payment may be made by cash, check, bank wire, or credit card (Visa or MasterCard). Payment by check must be made in either US dollars (\$) drawn on a US bank or British sterling (£) drawn on a British bank. All successful bidders outside North America and the United Kingdom will be invoiced an additional \$20 fee for bank charges, but buyers may deduct this fee if payment is made as required above. CNG may reduce or compromise any charge or fee at its discretion.

5. Bidders not known to us must provide us with satisfactory credit references or pay a deposit as determined at CNG's discretion before bidding. Minors are not permitted to bid without written consent of a parent guaranteeing payment. CNG may require payment in full from any bidder prior to delivery of lots. Title does not pass until lots are paid in full. Upon receipt of lots, the buyer assumes full responsibility for loss or damage. Delivery to the buyer's address of record shall constitute receipt by the buyer regardless of the identity of the person accepting delivery.

6. **Estimates are in U.S. dollars (\$US) and bids must be in even dollar (\$) amounts.** CNG will execute mail bids on behalf of mail bidders. Subject to reserves and opening prices, mail bids will be executed at one bidding increment (approximately 10%) over the next highest bid. In the case of identical bids, the earliest bid wins. A mail bid has priority over an identical floor bid. Bid by lot number. No lots will be broken. Bidders are responsible for errors in bidding. Check your bid sheet carefully.

7. A word on **Reserves**. CNG may place a reserve on any lot. However, no reserve will be higher than the estimate, and ordinarily lots are reserved at 60% of estimate.

8. Bidders personally guarantee payment for their successful bids, including bidders executing commission bids from other parties and bidders representing corporations or other entities. Buyers accepting commission bids from other parties do so at their own risk and remain responsible for payment under these Auction Terms.

9. In the event a successful bidder fails to make full payment within 30 days of the auction date, CNG reserves the right to deem the sale incomplete and to resell the material, and the bidder agrees to pay for the reasonable cost of such a sale and also to pay any difference between the resale price and the previously successful bid. CNG reserves all rights that it is entitled to under the Pennsylvania Uniform Commercial Code, including the right to offset any sums due from a successful bidder against any future consignment or purchase or monies or goods in possession of CNG.

10. Sales tax, postage, handling and insurance are the responsibility of the buyer and are added to all invoices where appropriate. For buyers in the European Union, CNG may import lots into the United Kingdom prior to shipment and charge buyers the import Value Added Tax. On any tax not paid by the purchaser which should have been paid, even if not invoiced by CNG, the purchaser agrees to pay the same on demand together with any interest or penalty that may be assessed. It is the responsibility of the buyer to comply with foreign customs and other regulations.

11. Prices Realized are published after the sale and are mailed with CNG's next publication. Prices realized are also posted after the sale on CNG's web site: www.cngcoins.com

12. Bidders hereby waive any claim for incidental, consequential or exemplary damages arising from this auction. The sole remedy that any participant in the auction shall have for any claim or controversy arising out of the auction shall be a refund, without interest, of all or part of the purchase price paid by the participant.

13. All rights granted by CNG or otherwise available to bidders and purchasers, under these Auction Terms or otherwise, are personal and may not be assigned or transferred to any other person or entity, whether by operation of law or otherwise. No third party may rely on any benefit or right conferred by these Auction Terms. Bidders acting as agents must disclose the agency in writing to CNG prior to the auction; otherwise rights are limited to the agent and are not transferable to the undisclosed principal.

14. Any dispute regarding this auction shall be governed by the laws of Pennsylvania and shall be adjudicated only by the Lancaster County Court of Common Pleas or the U.S. District Court for the Eastern District of Pennsylvania; all bidders submit themselves to the personal jurisdiction of these courts for this purpose, consent to service of process by registered or certified mail, and waive any contrary provisions of Articles 14 or 15 of the French Civil Code and any similar provisions in any jurisdiction. In any dispute regarding this auction, the prevailing party shall be entitled to recover its reasonable costs and attorney fees.

15. In the event of a dispute, the English version of these Auction Terms shall be definitive.

GOOD LUCK!

AUKTIONSBEDINGUNGEN

Dies ist eine Versteigerung (Mail Bid Sale) von **Classical Numismatic Group, Inc. (CNG)** bei der nur schriftliche Gebote akzeptiert werden. Durch die Abgabe eines Gebotes erkennen Sie die nachstehenden Versteigerungsbedingungen an:

1. Die aufgeführten Lose werden von CNG auf eigene Rechnung, als Vertreter verschiedener Besitzer und Einlieferer versteigert. CNG behält sich das Recht vor, Gebote zurückzuweisen, den Rufpreis zu bestimmen, die Steigerungsstufen festzulegen, die Reihenfolge der Lose zu verändern, bei Unklarheiten das Los neu aufzurufen, Lose von der Versteigerung zurückzuziehen, im Namen von CNG und der Einlieferer zu bieten, sowie den Einlieferer auf seine eigenen Lose bieten zu lassen. CNG kann Einlieferern und Käufern einen Vorschuss oder Kredit gewähren und kann bei jedem Los auch andere Interessen als das Aufgeld verfolgen. CNG kann auf eigene Rechnung als "Insider" mitbieten und dabei auch Informationen verwenden, die nicht allgemein zugänglich sind.

2. Neben dem Zuschlagspreis ist ein Aufgeld von **15%** von Käufern zu bezahlen.

3. Die Echtheit aller Münzen wird garantiert. Alle Beschreibungen geben die persönliche Beurteilung des Verfassers wieder, es wird insoweit keine Gewähr geleistet. Bitte beachten Sie, daß eine Auktion Käufe zur Ansicht ausschließt. Lose, die vor dem Verkauf besichtigt wurden, und Lose, die von bei der Versteigerung anwesenden Bieter (einschließlich Bieter), die Gebote im Namen anderer Parteien auf Provisionsbasis abgeben) gekauft wurden, können aus keinem Grund zurückgegeben werden, ausgenommen bei mangelnder Echtheit. Alle Reklamationen, ausgenommen Ansprüche in Bezug auf mangelnde Echtheit, müssen innerhalb von fünf Tagen nach dem Erhalt der Ware vorgebracht werden. Ansprüche auf Grund mangelnder Echtheit müssen von dem ursprünglichen Käufer in schriftlicher Form sofort nach Kenntnis, gestellt werden; und bei der Geltendmachung eines solchen Anspruchs muß der ursprüngliche Käufer die Ware sofort in dem gleichen Zustand an CNG zurückgeben, in dem sich die Ware zum Zeitpunkt der Auktion befand. Münzen, die in versiegelter Kapsel eines Prüf- oder Zertifizierdienstes angeboten wurden, können in keinem Fall zurückgenommen werden, nachdem diese aus der Kapsel entnommen worden sind, auch dann nicht, wenn die Echtheit angezweifelt wird. Bei Zahlung mit Kreditkarte stehen die Auktionsbedingungen bezüglich der Rückgabe rechtlich über dem Rückgaberecht des Kreditkartenausstellers. Schätzwerte sind nur als Richtlinien gedacht und stellen keine verbindlich Erklärung über den Wert dar.

4. Die Bezahlung wird sofort nach Erhalt der Rechnung fällig. Sollte die Rechnung nicht innerhalb von 30 Tagen nach der Auktion bezahlt sein, wird ein Zinssatz von 2% pro Monat oder die höchstmögliche gesetzlich erlaubte Zinsrate ab dem letzten Auktionstag fällig. Die Zahlung kann in bar, mit Scheck, mit Banküberweisung oder mit Kreditkarte (Visa oder MasterCard) erfolgen. Allen erfolgreichen Bietern außerhalb von Nordamerika und Großbritannien wird zusätzlich ein Betrag in Höhe von US-\$20,- für Bankgebühren in Rechnung gestellt; Käufer können jedoch diese Gebühr von ihrer Zahlung abziehen, wenn sie die Bezahlung auf die oben geforderte Weise vornehmen. CNG behält sich das Recht vor, fällige Gebühren nach eigenen Ermessen zu ändern.

5. Bieter, die CNG nicht bekannt sind, müssen CNG eine zufriedenstellende Kreditreferenz zur Verfügung stellen oder ein Depot hinterlegen, dessen Höhe von CNG festgelegt wird, ehe sie Gebote abgeben können. Minderjährige dürfen ohne die schriftliche Zustimmung eines Elternteils, der die Zahlung garantiert, nicht bieten. CNG kann von jedem Käufer Vorausskasse verlangen. Die versteigerten Lose bleiben bis zur vollständigen Bezahlung aller Forderungen von CNG Eigentum der Verkäufer. Nach Erhalt der Lose übernehmen die Käufer die volle Verantwortung für Verluste oder Schäden. CNG übernimmt keine Haftung für Waren, die an die angegebene Adresse, nicht aber an den Käufer persönlich ausgeliefert werden.

6. Die Schätzungen sind in US-Dollar (US-\$) und alle Gebote müssen auf gerade Dollarbeträge (US-\$) lauten. CNG führt schriftliche Gebote im Namen der Bieter aus. Vorbehaltlich der Mindestgebote und Rufpreise werden schriftliche Gebote eine Steigerungsstufe (von etwa 10%) über dem nächsthöchsten Gebot während der Versteigerung zugeschlagen. Bei gleichhohen Geboten wird der Zuschlag dem zuerst abgegebenen Gebot erteilt. Ein schriftliches Gebot hat Vorrang vor einem, das während der Versteigerung abgegeben wird. Das Bieten erfolgt nach Losnummern. Die Lose werden nicht aufgeteilt. Die Bieter sind für Fehler beim Bieten selbst verantwortlich. Überprüfen Sie Ihren Gebotsbogen gründlich.

7. Eine Anmerkung zu Mindestgeboten (Limiten). CNG behält sich das Recht vor, für beliebige Lose ein Mindestgebot (Limit) festzulegen. Jedoch ist kein Mindestgebot (Limit) höher als der Schätzwert, und gewöhnlich werden Lose zu 60% des Schätzwertes ausgerufen, wenn kein anderes Gebot (Limit) vorliegt.

8. Die Bieter haften persönlich für die Bezahlung ihrer erfolgreichen Gebote; hierin eingeschlossen sind die Bieter, die Gebote von anderen Parteien auf Provisionsbasis abgeben, und die Bieter, die juristische Personen oder andere Rechtsträger vertreten. Käufer, die für Gebote von anderen Parteien Provisionen erhalten, geben die Gebote auf ihr eigenes Risiko ab, und sie sind für die volle Begleichung gemäß diesen Auktionsbedingungen verantwortlich.

9. In dem Fall, daß ein erfolgreicher Bieter die Rechnung nicht vollständig innerhalb von 30 Tagen begleicht, behält sich CNG das Recht vor, den Kauf rückgängig zu machen und die Waren erneut zu verkaufen; der Bieter erklärt sich damit einverstanden, alle anfallenden Kosten eines solchen Verkaufs zu zahlen und auch für den Fehlbetrag zwischen dem Wiederverkaufspreis und dem Preis des vormals erfolgreichen Gebotes aufzukommen. CNG behält sich auch alle Rechte vor, die sich für CNG aus dem Handelsgesetzbuch für Pennsylvania, dem Pennsylvania Uniform Commercial Code, ergeben; hierin eingeschlossen ist das Recht, jedwede nach erfolgtem Zuschlag fällig gewordenen Beträge, gegen beliebige künftige Einlieferungen, Ankäufe, Gelder oder Güter, die sich im Besitz von CNG befinden, aufzurechnen.

10. Umsatzsteuer, Porto, Transportkosten und Versicherung fallen in den Verantwortungsbereich des Käufers und werden allen Rechnungen, falls zutreffend, hinzugerechnet. Für Käufer in der Europäischen Union kann CNG die Lose vor dem Versand nach Großbritannien importieren und dem Käufer die entstandene Mehrwertsteuer berechnen. Der Käufer erklärt sich bereit, angefallene und nicht entrichtete Steuern auch dann, wenn sie von CNG nicht in Rechnung gestellt wurden auf Verlangen zusammen mit aufgelaufenen Zinsen, sowie eventuell auferlegte Strafen zu bezahlen. Es fällt in den Verantwortungsbereich des Käufers, die Zollbestimmungen und andere Regeln im Ausland zu erfüllen.

11. Die erzielten Preise werden nach dem Verkauf bekanntgegeben und werden zusammen mit der nächsten Veröffentlichung von CNG versandt. Sie sind auch im Internet auf CNG's Web Site www.cngcoins.com abrufbar.

12. Die Bieter verzichten hiermit auf alle sich aus dieser Auktion ergebenden Ansprüche hinsichtlich Schadenersatz für Aufwendungen, Schadenersatz für Folgeschäden, oder einer über den verursachten Schaden hinausgehenden Entschädigung. Das einzige Recht, das einem Teilnehmer an der Auktion auf Grund eines auf die Auktion zurückgehenden Anspruches oder einer entsprechenden Streitfrage zusteht, besteht in einer zinslosen Rückvergütung des ganzen oder eines Teils des gezahlten Kaufpreises.

13. Alle Rechte, die Bietern oder Käufern von CNG gewährt werden oder ihnen anderweitig zur Verfügung stehen, und zwar gemäß diesen Auktionsbedingungen oder anderweitig, sind persönlicher Art und können nicht an eine andere Person oder einen Rechtsträger abgetreten oder übertragen werden, sei es durch gesetzlichen Rechtsübergang oder anderweitig. Keine dritte Partei kann sich auf Leistungen oder Rechte berufen, die durch diese Auktionsbedingungen gegeben werden. Bieter, die als Vertreter handeln, müssen diese Vertretung CNG vor der Auktion in schriftlicher Form offenlegen; andernfalls sind die Rechte auf den Vertreter beschränkt und sind nicht auf den nicht offengelegten Auftraggeber übertragbar.

14. Ein Rechtsstreit hinsichtlich dieser Auktion unterliegt des Gesetzen von Pennsylvania und kann nur von dem Lancaster County Court of Common Pleas oder dem U.S. District Court for the Eastern District of Pennsylvania gerichtlich entschieden werden; alle Bieter unterwerfen sich für diesen Zweck auf Grund einer Zustellung durch eingeschriebene Post den Staatshoheitsrechten dieser Gerichte und verzichten auf alle gegensätzlichen Bestimmungen der Artikel 14 oder 15 des französischen Bürgerrechtes und ähnlichen Bestimmungen in anderen Gerichtsbarkeiten. In einem Rechtsstreit hinsichtlich dieser Auktion ist die obsiegende Partei berechtigt, ihre angemessenen Kosten und Rechtsanwaltskosten erstattet zu bekommen.

15. Im Falle einer Streitfrage ist die englische Version dieser Auktionsbedingungen rechtskräftig.

**Ihre schriftlichen Gebote müssen bis zum
14. Mai 2008 bei uns eingehen.**

VIEL ERFOLG!

CONDITIONS DE VENTE AUX ENCHÈRES

Ceci est une vente aux enchères par correspondance organisée par **Classical Numismatic Group, Inc. (CNG)**. Faire une offre à l'enchère signifie l'acceptation des conditions suivantes:

1. Les objets proposés dans ce catalogue sont mis en vente par CNG agissant pour son propre compte et en tant qu'agent représentant divers autres propriétaires. Nous nous réservons le droit de refuser une offre ou enchère, de décider de la mise à prix, de fixer les paliers de hausse des enchères, de modifier l'ordre dans lequel se déroule la vente aux enchères, de relancer les enchères en cas de désaccord, de retirer un lot quelconque, de faire une offre pour le compte de CNG, de faire une offre pour le compte du propriétaire et de lui permettre de faire des enchères sur ses propres lots. CNG peut prêter ou avancer des fonds aux propriétaires ou enchérisseurs et peut avoir des intérêts, autres que les frais de commission, sur n'importe quel lot. CNG a l'option de faire une offre pour son propre compte avec des renseignements non disponibles au public.
2. Une commission de **15%** à la charge de l'acquéreur sera ajoutée au prix de vente.
3. Toutes les pièces de monnaie sont garanties authentiques. L'attribution, la date, l'état et autres qualificatifs sont l'opinion de l'auteur du catalogue sans que ceci implique de garantie explicite ou implicite. Veuillez noter qu'une vente aux enchères n'est pas une vente conditionnelle. Les lots inspectés avant la vente et les lots achetés par les enchérisseurs dans la salle (y compris les enchérisseurs agissant pour le compte d'autres personnes) ne peuvent en aucun cas être retournés excepté en cas de problème d'authenticité. Toute contestation concernant la description ainsi que toute intention de retourner une monnaie (excepté dans le cas de problèmes d'authenticité), doivent être formulées dans les 5 jours qui suivent la réception de l'envoi. Toute contestation ayant trait à l'authenticité doit être faite par écrit par l'acquéreur initial immédiatement et, il a l'obligation dans les plus brefs délais de renvoyer le lot à CNG dans le même état qu'il l'a acquis. Les pièces de monnaie qui ont été encapsulées ("slabbed") par une société de classification et/ou d'identification ne peuvent être rendues pour aucune raison, y compris d'authenticité, si elles ont été enlevées de leur capsule ("slab"). Si le paiement est fait par carte de crédit, les droits relatifs aux renvois sont régis par les conditions de la vente aux enchères, qui prévalent sur ceux affichés par l'émetteur de la carte. Les valeurs estimatives sont données à titre purement indicatif et ne sont pas une définition fixe de la valeur réelle.
4. La facture doit être payée dès sa réception. Des intérêts et frais de collecte s'élevant à 2% par mois (ou au taux le plus élevé autorisé par la loi) à compter de la date de la vente aux enchères seront payables sur les factures qui ne sont pas réglées dans les 30 jours qui suivent la date de la vente. Le règlement peut se faire en liquide paiement, ou par chèque, transfert, ou carte de crédit (Visa ou MasterCard). Le paiement par chèque doit se faire soit en dollars US (\$) si le chèque est tiré sur une banque américaine, soit en livres sterling anglaises (£) s'il est tiré sur une banque britannique. Tous les acquéreurs domiciliés ailleurs qu'en Amérique du Nord ou au Royaume-Uni se verront facturer un supplément de 20 \$ pour frais bancaires mais qu'ils peuvent déduire si le paiement est effectué de la manière indiquée ci-dessus. CNG a la possibilité de réduire ou transiger tout paiement ou frais.
5. Les enchérisseurs que nous ne connaissons pas doivent nous fournir des références de solvabilité suffisantes ou verser des arrhes selon accord avec CNG avant les enchères. Les mineurs ne sont pas autorisés à faire des enchères sans l'autorisation écrite de l'un de leurs parents garantissant le paiement. CNG peut exiger le règlement intégral de la part d'un enchérisseur avant la livraison des lots. La propriété des lots ne se trouve transférée qu'une fois les lots ont payés intégralement. À la réception des lots, l'acquéreur assume l'entière responsabilité en cas de perte ou d'endommagement de ceux-ci. L'acceptation d'un envoi à l'adresse du client constitue un reçu quelle que soit la personne qui la réceptionne.
6. Les valeurs estimatives sont données en dollars (\$US) et les offres/enchères doivent être en montants entiers en dollars (\$). CNG exécutera les offres/enchères soumises par correspondance pour le compte des enchérisseurs. Sauf dans le cas d'une réserve, les offres par correspondance seront exécutées à approximativement 10% de plus que l'enchère la plus proche. En cas d'offres identiques, la première l'emporte. Une offre par correspondance l'emporte sur une offre identique dans la salle. Faites vos offres en écrivant le numéro du lot. Les lots ne seront pas divisés. Les enchérisseurs assumeront la responsabilité des erreurs sur leur bulletin d'enchère, c'est pourquoi il est recommandé de tout contrôler avec soin.
7. Quelques mots sur les prix minimum. CNG peut fixer un prix minimum pour n'importe quel lot. Aucune réserve ne sera toutefois supérieure à la valeur estimative et les lots se voient généralement attribuer un prix correspondant à 60% de la valeur estimative.

8. Les enchérisseurs garantissent personnellement le paiement de leurs offres en cas d'attribution du lot, même s'ils agissent pour le compte d'un tiers. Les acquéreurs se chargeant d'offres/enchères à la commission venant d'autres personnes le font à leurs propres risques et restent responsables vis-à-vis de CNG du paiement selon les présentes Conditions de Vente aux Enchères.

9. Dans le cas où un acheteur ne s'acquitterait pas de son obligation de paiement intégral dans les 30 jours, CNG se réserve le droit de revendre le lot et l'acquéreur accepte de payer les frais raisonnables d'une telle vente et aussi de payer la différence entre le prix de la nouvelle vente et celui de l'enchère précédemment acceptée. CNG se réserve tous les droits dont elle peut se prévaloir en vertu du Code Commercial Uniforme de Pennsylvanie, notamment le droit de déduire les sommes dues par un acquéreur sur un envoi futur ou sur une acquisition future ou sur des sommes d'argent ou marchandises étant en la possession de CNG.

10. La taxe sur les ventes, les frais postaux, la manutention et l'assurance sont la responsabilité de l'acquéreur et sont ajoutés à toutes les facturés le cas échéant. Pour les acquéreurs de l'Union Européenne, CNG pourra importer des lots à l'intérieur du Royaume-Uni, en ce cas, avant l'envoi les acquéreurs se doivent de payer la taxe sur la valeur ajoutée. Dans le cas où toute taxe restant impayée par l'acquéreur, mais qui aurait dû être payée, même si elle n'a pas été facturée par CNG, l'acquéreur s'engage à régler le montant de celle-ci ainsi que les intérêts ou la pénalité étant imposés le cas échéant. Il incombe à l'acquéreur d'assurer l'obtention de la réglementation douanière étrangère et autres règlements.

11. Les Prix Réalisés sont publiés après la vente et sont envoyés par la poste avec la publication suivante de CNG. CNG poste aussi les prix réalisés sur son site Web: www.cngcoins.com.

12. Les enchérisseurs renoncent à toute revendication de dommages et intérêts en cas de dommage causé par la vente aux enchères CNG. Le seul recours qu'un participant à la vente aux enchères aura à l'issue d'une réclamation ou d'un différend sera un remboursement sans intérêts, de la totalité ou d'une partie du prix d'achat payé par le participant.

13. Tous les droits accordés par CNG ou dont les enchérisseurs et acquéreurs peuvent autrement se prévaloir leur sont personnels et ne peuvent être ni cédés ni transférés à une autre personne physique ou morale, que ce soit du fait de l'intervention de la loi ou autrement. Aucune tierce personne ne peut s'appuyer sur un avantage ou droit conféré par les présentes Conditions de Vente aux Enchères. Les enchérisseurs agissant en tant qu'intermédiaires doivent divulguer leur mandat d'agence par écrit à CNG avant la vente aux enchères; autrement les droits seraient exclusifs à l'agent et ne seraient pas cessibles au donneur d'ordre qu'il représente.

14. Tout différend concernant la présente vente aux enchères sera régi par les lois de Pennsylvanie et sera tranché par la "Cour des Plaids Communs" (Court of Common Pleas) du Comté de Lancaster (Lancaster County) ou le Tribunal de District Fédéral (U.S. District Court) du District Oriental de Pennsylvanie, tous les enchérisseurs se soumettent à la juridiction personnelle de ces tribunaux, de ce fait, consentent à respecter les actions engagées et acceptent à cette fin toute signification par courrier recommandé ou certifié, et renoncent à se prévaloir de toute disposition contraire des articles 14 ou 15 du code civil français, et provisions similaires en toute juridiction. Dans tout litige concernant la présente vente aux enchères, la partie gagnante aura le droit de recouvrer ses frais d'avocat et coûts raisonnables.

15. En cas de litige, la version en anglais des présentes Conditions de Vente aux Enchères fera foi.

**Les commissions doivent nous parvenir
avant le 14 Mai 2008.**

BONNE CHANCE!

CONDIZIONI DI VENDITA

La presente asta per corrispondenza è bandita da **Classical Numismatic Group, Inc. (CNG)**. La presentazione di offerte all'asta comporta l'accettazione delle seguenti condizioni:

1. I lotti elencati in questo catalogo sono posti in vendita sia da CNG per proprio conto sia come agente di altri conferenti. CNG si riserva il diritto di rifiutare un'offerta, di determinare il prezzo d'apertura, di fissare gli incrementi di offerte, di variare l'ordine di svolgimento dell'asta, di riaprire la licitazione in caso di controversia, di ritirare un lotto, di fare offerte per conto di CNG stesso o di un affidatario e di permettere a un conferente di fare offerte per i propri lotti. CNG può prestare a anticipare denaro ai conferitori o ai possibili acquirenti, e potrebbe avere un ulteriore interesse oltre la commissione su qualsiasi lotto. CNG può partecipare all'asta per suo conto, da "insider", utilizzando informazioni non disponibili al pubblico.

2. Una commissione del **15%** sarà aggiunta al prezzo di aggiudicazione.

3. Tutte le monete sono garantite autentiche. L'attribuzione, la data, le condizioni ed eventuali altre descrizioni sono opinioni del compilatore del catalogo nei confronti delle quali non si danno garanzie espresse o tacite. Va ricordato che una vendita all'asta non è una vendita con riserva di gradimento. I lotti esaminati prima dell'asta e i lotti acquistati dagli offerenti in sala (inclusi gli offerenti che fanno offerte per conto di terzi) non possono essere restituiti indipendentemente dalla ragione salvo nel caso di non autenticità. Tutte le rivendicazioni di descrizione inesatta e tutte le richieste di restituzione devono pervenire entro 5 giorni dal ricevimento del materiale. Le rivendicazioni di non autenticità devono essere inoltrate per iscritto dall'acquirente originale immediatamente dopo la scoperta dell'eventuale non autenticità e contemporaneamente l'acquirente deve restituire il lotto a CNG nelle stesse condizioni del momento dell'asta. Le monete che sono state sigillate con il grado di qualità e/o l'autenticazione non potranno essere restituite per alcuna ragione anche di dubbi di autenticità, qualora siano state rimosse dalla loro capsula o quest'ultima sia stata manomessa. Se il pagamento avviene con carta di credito, il diritto alla restituzione è regolamentato da queste Condizioni d'Asta che annullano qualsivoglia diritto alla restituzione promulgato da chi ha emesso la carta di credito. Le stime s'intendono a puro titolo di orientamento e non sono espressioni di un'opinione di valore.

4. Le fatture devono essere pagate non appena ricevute. Per le fatture non pagate entro 30 giorni dalla data dell'asta dovranno essere pagati un interesse e una penale per il ritardo nella misura del 2% al mese o, se inferiore, al massimo consentito per legge. Il pagamento può avvenire per contanti, tramite assegno valido, bonifico bancario o carta di credito (Visa o MasterCard). I pagamenti con assegno devono essere in dollari USA (\$) su una banca americana o in sterline inglesi (£) su una banca britannica. A tutti gli aggiudicatari al di fuori dell'America del Nord e del Regno Unito vengono fatturati ulteriori \$20 per competenze bancarie, somma che può essere dedotta se il pagamento è effettuato come sopra indicato. CNG può ridurre o negoziare ogni costo o tariffa a sua discrezione.

Nessun lotto può essere suddiviso. Gli offerenti sono responsabili degli errori nelle offerte. Si prega di controllare attentamente il foglio offerte.

7. Per quanto riguarda i prezzi minimi di base, CNG può fissare un prezzo minimo per qualsiasi lotto, nessun prezzo minimo è superiore alla stima e generalmente è il 60% della stima.

Gli acquirenti che accettano di fare offerte per conto di terzi lo fanno a loro rischio e rimangono responsabili per il pagamento ai sensi delle presenti condizioni d'asta.

9. Se un acquirente non effettua un pagamento entro 30 giorni dalla data dell'asta si riserva il diritto di considerare la vendita incompleta e di rivendere il o i lotti e l'offerente s'impegna a far fronte al costo ragionevole di detta vendita ed a corrispondere l'eventuale differenza tra il prezzo di rivendita e il precedente prezzo di aggiudicazione. CNG si riserva tutti i diritti che gli spettano ai sensi del Codice Commerciale Uniformato della Pennsylvania, incluso il diritto di compensare una somma dovuta da un acquirente con futuri conferimenti o acquisti o denaro o merci in possesso del CNG.

10. Le imposte sulle vendite, le spese postali, i costi di amministrazione e l'assicurazione sono a carico dell'acquirente e sono aggiunte come appropriato a tutte le fatture. Per gli acquirenti nell'Unione Europea CNG può importare i lotti nel Regno Unito prima della consegna e pretendere il pagamento da parte degli acquirenti dell'importo relativo all'imposta sul Valore Aggiunto. Nel caso di un'imposta o tassa dovuta e non corrisposta dall'acquirente, anche se non fatturata da CNG, l'acquirente si impegna a corrisponderla su richiesta unitamente agli eventuali interessi o penalità che possano derivare. È la responsabilità dell'acquirente rispettare le norme doganali o altri regolamenti vigenti all'estero.

11. I prezzi realizzati sono pubblicati dopo l'asta e sono comunicati per posta con il successivo catalogo CNG. I prezzi realizzati sono anche disponibili dopo l'asta presso il sito web di CNG: www.cngcoins.com.

12. Gli acquirenti accettano di rinunciare a rivendicazioni per il rimborso di danni indiretti o di risarcimenti esemplari sorti in relazione all'asta. L'unica riparazione alla quale un partecipante all'asta ha diritto a fronte di una rivendicazione o controversia in relazione all'asta sarà il rimborso, senza interesse, di tutto o parte del prezzo di acquisto da esso versato.

13. Tutti i diritti garantiti da CNG o comunque a disposizione degli offerenti e degli acquirenti in base a queste condizioni d'asta o diversamente sono personali e non possono essere concessi o trasferiti a terzi, persone fisiche o giuridiche, sia in base a leggi che in altro modo. A Note about Color

The color images which appear in this catalogue and on our web site are produced by digital photography. We make every effort to produce photographs which accurately represent the coins pictured. However, due to the processes involved in digital photography and color printing, image color may vary slightly from actual color. In particular, all lots have been photographed under high-intensity light, and the images may appear brighter than the actual coins.

Second Known Unpublished but for Garrucci

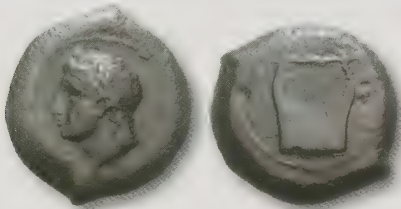

16. **SOUTHERN ITALY, Uncertain.** 3rd-2nd centuries BC. Æ 26mm (12.48 g, 6h). Head of Athena(?) left, wearing crested helmet / Demeter seated left, cradling long torch in left arm, pulling veil with right hand; column in background, grain ears to left, uncertain legend to right. Garrucci pl. CXIII, 4 (Lokroi Epizephyrioi), otherwise unpublished. VF, rough dark green and brown patina. Extremely rare. (\$100)

The specimen in Garrucci is apparently the sole published example of this type, and must have been equally as worn, as the apparent legend to the right of the throne is not specified. His placement of this coin at Lokris is not well established; other than the similarity of the types to the Lokrian issues associated with Pyrrhos, there is nothing to substantiate this attribution. Furthermore, the helmet type depicted on Athena, which suggests a Roman influence, is very unusual for Lokris. The reverse type, in which the figure is certainly holding a long torch, is likewise atypical for Lokris. As both deities are common at many mints in Southern Italy, many of which had a high production rate during this time frame, placement at any particular location is as yet uncertain.

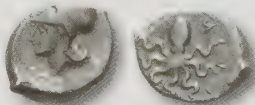

17. **SICILY, Abakainon.** 343-336 BC. Æ Litra (10.32 g, 12h). Head of nymph right / Forepart of man-headed bull right. CNS 1; SNG ANS -; SNG Copenhagen 7. Fine, brown patina. Rare. (\$100)

36. **SICILY, Herbessos.** 339-336 BC. Æ Hemilitron (18.86 g, 6h). Wreathed head of female (Sikelia?) right / Forepart of man-headed bull right. Castrizio series III, 1 (D1/R1); CNS 5 OS; SNG ANS -. Near VF, olive brown patina. Overstruck on Zeus Eleutherios/Horse drachm of Syracuse (cf. CNS 80). Rare. (\$200)

Ex G. Hirsch 181 (22 February 1994), lot 51.

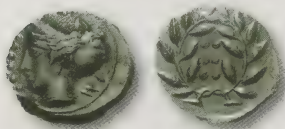

Very little is known about Herbessos. Practically all of its coinage dates from the time of Timoleon of Syracuse, with whom Herbessos was allied.

37. **SICILY, Himera.** Circa 420-407 BC. Æ Hemilitron (7.14 g, 3h). Nude rider on a goat right, blowing into conch, holding club and lion(?) skin; below, Corinthian helmet right / Nike advancing left, holding open wreath in right hand, dress in left; six pellets (mark of value) to left. 38. **SICILY, Himera.** Circa 420-407 BC. Æ Tetras(?) (2.53 g, 12h). Nude rider on a goat left, blowing into conch; three pellets below / Nike advancing left, holding open wreath. Kraay, *Bronze*, group b, 2; CNS 31; SNG ANS (Part 5) 1339. Good Fine, dark green patina. Rare. (\$100)

39. **SICILY, Himera.** Circa 420-407 BC. Æ Hemilitron (3.11 g, 5h). Head of nymph left; six pellets (mark of value) before / Six pellets (mark of value) within wreath. Kraay, *Bronze*, group b, 3; CNS 35; SNG ANS 186. Good VF, hard dark green patina. (\$150)

Unusual Graffito

40. **SICILY, Himera.** Circa 420-407 BC. Æ Hemilitron (3.94 g, 11h). Head of nymph left; six pellets (mark of value) before / Six pellets (mark of value) within wreath. Kraay, *Bronze*, group b, 3; CNS 35; SNG ANS 186. VF, green patina, small K (graffito?) incised on back of headband. (\$100)

The presence of the incised K on the headband is quite enigmatic. Unlike typical graffiti, which are usually crudely engraved on the surface with shallow strokes of a pointed object, this K appears to have been deeply cut into the headband with great care. Moreover, as some of the letter is filled by the patina, it clearly was cut in antiquity while the coin was in circulation.

41. **SICILY, Himera (as Thermai Himerensis).** 407-406 BC. Æ 15mm (3.12 g, 7h). Head of Herakles right, wearing lion skin / Head of Hera right, wearing stephane. CNS 7; SNG ANS 190. Good VF, rough green patina, lightly smoothed. (\$100)

42. **SICILY, Himera (as Thermai Himerensis).** Circa 208-205 BC. Æ 20mm (4.21 g, 11h). Bearded head of Herakles right, wearing lion skin / Tyche standing left, holding patera and cornucopia. BAR issue 2; CNS 20; SNG ANS 192-3. VF, rough green patina, irregular flan. (\$100)

43. **SICILY, "Kainon".** Circa 365 BC. Æ 19mm (9.71 g, 11h). Griffin springing left; below, grasshopper left / Horse prancing left, trailing rein; star above. CNS 10; SNG ANS 1176 (Alaesa). Near VF, green and brown patina. (\$100)

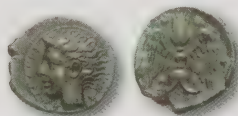

Not identifiable with a known mint in Sicily, the Kainon issues have traditionally been attributed to Alaisa. They may have been struck by mercenaries in the employ of Dione of Leontini.

44. **SICILY, Kamarina.** Circa 420-405 BC. Æ Tetras (3.48 g, 10h). Facing gorgoneion / Owl standing right, head facing, grasping lizard; three pellets (mark of value) in exergue. Westermarck & Jenkins 185; CNS 8; SNG ANS 1221-4. VF, dark green patina. (\$150)

45. **SICILY, Kamarina.** Circa 420-405 BC. Æ Tetras (3.13 g, 3h). Helmeted head of Athena left / Owl standing left, head facing, grasping lizard; three pellets (mark of value) in exergue. Westermarck & Jenkins 200; CNS 34; SNG ANS 1228-9. Good VF, brown patina. (\$150)

46. **SICILY, Katane.** Circa 412-410 BC. Æ Tetras (2.13 g, 7h). Bare head of Amenanos left / Upright winged thunderbolt; three pellets around. Boehringer, *Frühen* p. 156; CNS 1; SNG ANS 1272. Good VF, dark green patina. (\$200)

48. **SICILY, Katane.** Circa 200-186 BC. Æ 21mm (8.09 g, 12h). Laureate head of Dionysos right / Dionysos standing left, holding two scepters; [monogram to left], two monograms to right. BAR issue 11; CNS 21; SNG ANS 1294. Near VF, brown-green patina, a little rough. (\$100)

Ex Whitford (9 October 1993), lot 649.

49. **SICILY, Leontini.** Circa 207-200 BC. Æ 15mm (2.63 g, 6h). Wreathed and veiled head of Demeter left; plow behind / Bundle of four grain ears. BAR issue 2; CNS 9; SNG ANS 274. VF, brown surfaces, a little rough. (\$100)

The text for Type 11 in CNS has a number of errors. The obverse description is head of Dionysos left with hair falling down his neck. Type 11 st1, however has a similar description, but notes the hair falls in loose curls. As such, coins 11/2 and 11/4 should be placed under 11 st1. Likewise, the head on coins 11/1, 11/3, and 11/5 do not have hair down their neck, and thus do not belong in Type 11 (and probably do not depict Dionysos). Coin 11/2, therefore, is the sole example correctly fitting the description for Type 11.

These obverse and reverse types were used on a variety of Arvernian issues datable just prior to, and contemporary with, the Gallic Wars. The style of this anepigraphic issue is identical to the epigraphic coins marked CAS, which early numismatists linked to Vercassivellaunos, the cousin of Vercingetorix, but more recent studies have discounted this attribution (see B. Fischer, "Le numéraire à la légende CAS et les monnaies de Vercingetorix" in: *Hommage à Lucien Lerat* (Paris, 1984), pp. 277-87). While the style of the head is different than the Vercingetorix-inscribed issue, the present issue either preceded the inscribed issue of the famous chieftain, or was contemporary with it (see also S. Nieto, "La place du monnayage arverne dans les monnayages gaulois du centre et du sud de la Gaule au I^{er} et I^{er} siècles av. J.-C.: étude numismatique et analytique" in: *Proceedings of the 13th International Numismatic Congress* (Madrid, 2005), pp. 459-470, Phase IV).

Aulus Hirtius is best known for writing a number of texts on military subjects, and was consul following the assassination of Caesar. Demonstrating the usual flare shown by the die engravers in the service of Pyrrhos during his military expedition in Italy and Sicily, the small gold issues of 280/279 depicting Nike and Leukippos (HN Italy 1629-1631) are of a refinement second to none. The traditional city founder is rendered in exquisite detail with the added novelty of his helmet being decorated with Scylla hurling a stone, the very embodiment of aggressive violence before the enemy in time of war.

Originally described in CNG 72 as anepigraphic, further study has revealed that there are faint traces of a legend (...ME?) curving downward along the left side of the obverse, as well as a trace of the letter M at 12 o'clock on the reverse. Another specimen in a private collection, struck from similar dies, also shows traces of these letters. Another interesting aspect of these coins is the flan, which is more round than the typical Poseidonian pieces, and there is no indication of an incuse on the reverse, suggesting they belong to a period after 445. At the same time, there is no trace of an obverse border, which likewise suggests an issue earlier than 445. In any event, all of these characteristics and the curving obverse legend are quite dissimilar to other nomoi at Poseidonia, and are quite rare, with the Munich piece apparently being the sole published example.

One of the earliest of the recognized masters of Sicilian engraving, the unknown artist who created the Demareteion dekadrachm of Syracuse was also responsible for several coins struck for the neighboring city of Leontini. R. Ross Holloway discusses the relationship of the Leontini tetradrachms with the masterworks of the "Demareteion Master" at Syracuse in "Damarete's Lion," *ANSMN* XI, pp. 1-11. He regards them as works of the same hand, while Carmen Arnold-Biucchi in her work on the Randazzo Hoard sees influence from, but not the work of, the master, with the Leontini piece being a few years later and in a more developed realistic style. In any case, these tetradrachms of Leontini are among the finest works of Sicilian numismatic art.

Huge Archaic Bronze Proto-Wheel

Photo reduced by 50%

The sun cross, a cross inside a circle, is one of the oldest and most widely used religious symbols in human history. A powerful symbol of the sun and its diurnal journey across the sky, the sun cross is also associated with the wheel and its invention. Commonly found on rock carvings dating to the prehistoric era, the symbol appears in ancient Egypt, China, Europe, Anatolia, and Mesopotamia. Miniature cast wheels were common votive gifts in the sanctuaries of the sun gods in Northern Greece, Macedonia, and Thrace during the Archaic and Classical periods. Bronze was a natural choice for the metal used, because in addition to its bright, "sun-lit" appearance, bronze was considered a sacred, 'pure' material in ancient times (cf. a similar inscribed votive wheel in L.H. Jeffery, *The Local Scripts of Archaic Greece* [Oxford: the Clarendon Press, 1961], p. 106). Later, such wheel symbols became a common motif on coinage, most prominently seen on the tribal coinage in the Thraco-Macedonian region (e.g. the Edones and Derrones), as well as the coinage of a number of Black Sea settlements, such as Istros.

Apollonia Prepares for War

The 5th and 4th century BC coinage of Apollonia Pontika reflects that city's origins: commercial wealth and maritime power. The gorgon was a popular apotropaic device, seen as warding off evil; thus a number of ancient Greek cities adopted it as a coin design. The anchor and the crayfish attest to the city's reliance on maritime commerce for its economy, and the anchor depicted on these coins is actually one of the first anchors of modern design rendered in Greek art.

In 342/1 BC, Philip II attacked and conquered Apollonia as well as other towns in Thrace, thereby incorporating these areas into the Macedonian realm. These silver drachms of Apollonia were struck in the period during the military buildup prior to Philip's conquest, when the city needed to produce coinage to finance its defense against the Macedonian invasion. Philip's conquest, however, brought a close to the city's autonomous silver coinage, as no issue subsequent to this one was ever minted.

Two Rare Late Thracian Issues

299. Rhaiskuporis I, with Kotys II. Circa 48-42 BC. Æ 20mm (7.59 g, 1h). Diademed and draped bust of Kotys II right / Victory advancing left, holding wreath and palm. Youroukova 153-6; RPC I 1702. VF, green patina. Rare. (\$200)

The supplement to RPC I corrected the description of the reverse of this type, from "Victory carrying trophy" to "Trophy." However, the description of the coinage of Rhaiskuporis in RPC incorrectly states that Youroukova showed that this coinage was struck under both Rhaiskuporis I and Kotys II. Youroukova actually says that Rhaiskuporis was the sole issuer of this coinage, and he placed the deceased Kotys' titles and bust on his coins for political purposes.

THRACO-MACEDONIAN TRIBES

The Last Derrones Dodekadrachm?

- 301. Derrones.** Circa 480-465 BC. AR Dodekadrachm (30.34 g). Reduced standard. Driver, holding goad, driving ox cart left; above, [Δ]-E and crested Corinthian helmet left / Triskeles right [within incuse square]. Topalov -; cf. HPM pl. II, 7; SNG ANS -; cf. Mouchmov 6218 (similar style); CNG 75, 119 (same dies). Good VF, toned, minor flan crack. Rare, this issue unpublished in the standard references. (\$5000)

A small number of this unpublished type recently appeared on the market within a group of Derrones dodekadrachms. The simplified style and light weight (the usual dodekadrachm weight is about 40 grams) have led to the suggestion that this new type may be a contemporary imitative issue. However, several factors indicate that this coin is more likely a late official issue. An imitative issue would be highly unusual in this period, and visual inspection indicates that the silver quality is no less fine than the usual issues. Although the style is simplified compared with some other Derrones dodekadrachms, there is considerable variety within the whole series, and some published examples (see above) do display a similar style. Moreover, within the same group another unpublished variety appeared with a weight of 36.90 g (Gemini III, lot 84). Both new types appear to have minimal wear, perhaps less than other dodekadrachms in the group, so they may postdate the other pieces. The presence of the lighter weight pieces in the same group as the usual issues suggests that the lighter weight pieces were considered acceptable payment (although perhaps at a value commensurate with their weight) along with the others. All these factors indicate that these light weight types represent an official transition to a lower weight standard in the late Derrones dodekadrachms, culminating with the present coin which may represent the final issue in this impressive series.

- 302. Mygdones or Krestones.** Circa 485-470 BC. AR Diobol (0.96 g). Goat kneeling left, head reverted; two pellets around / Quadrupartite incuse square. Lorber, *Goats* issue 16; HPM pl. III, 24. Good VF, toned. (\$200)

THRACO-MACEDONIAN REGION

- 303. Uncertain.** 5th century BC. AR Hemiobol (0.55 g). Horse grazing right / Incuse square divided by one thick band perpendicular to two thin bands. Apparently unpublished. VF, some porosity, find patina. (\$200)

- 304. Uncertain.** 4th century BC. AR Hemiobol (0.23 g, 7h). Crested Corinthian helmet left / Amphora and caduceus in linear square. Tzamalís -; HPM -; Traité -; AMNG -. VF, toned, minor porosity. Very rare, unpublished in the standard references. (\$200)

- 305. Uncertain.** 5th-4th centuries BC. AR Hemiobol (0.27 g, 6h). Facing gorgoneion / Crested helmet within incuse square. LHS 100, lot 197 (Maroneia), otherwise apparently unpublished. Near VF, a little porous. (\$200)

LHS attributed their piece based on the similarity of style of the gorgoneion to known obols at Maroneia (Schönert-Geiss 354-6). The helmet, however, is problematic. First, an equal argument can be made for the similarity of the helmet to those on the issues of the early Macedonian kings as well as a number of mercenary issues in Magna Graecia. Second, a helmet never appears as a type at Maroneia. Finally, all of the issues of Maroneia prior to the second century BC include either some form of horse or grapes, neither of which appears here. Nonetheless, the characteristics of the flan, as well as the general style, suggest a placement in the Thraco-Macedonian region.

- 306. Uncertain.** 4th century BC. AR Hemiobol (0.24 g, 2h). Head of satyr right / Kylix in incuse circle. Tzamalís -; HPM -; Traité -; AMNG -; CNG 69, lot 229; Münzen und Medaillen FPL 472, no. 95; Hauck & Aufhäuser 17, lot 44. VF, minor porosity. Very rare, unpublished in the standard references. (\$300)

Fifth Known Aineia Tetradrachm

307. Aineia. Mid 4th century BC. AR Tetradrachm (13.90 g, 10h). Wreathed head of nymph right, wearing single-pendant earring / Bull standing right, head reverted. CNG 76, 250; Triton VIII, 104; Giessener Münzhandlung 102, lot 133; CNG 67, lot 401 (all from the same dies). VF, rough surfaces, some cleaning marks. Extremely rare, the fifth known, all from a single pair of dies. (\$2000)

Aineia (mod. Nea Michaniona) was located on the north-east coast of the Chalkidike. It was a comparatively obscure place in ancient times, occupied from the Archaic through the Hellenistic periods. Some fine burial mounds from the city have produced gold treasures, and the city is attested in Athenian fiscal documents. According to legend it was founded by Trojans, who named it after the famous Trojan hero, Aineias (Aeneas).

The occasion for the issue of this impressive silver tetradrachm is not known, though by its style and fabric it can be dated to the middle of the fourth century BC. Its designs were clearly inspired by existing Greek coin types, though it does distinguish itself with some local flare. The head of the nymph on the obverse, wreathed in grain, is seemingly based upon the prolific issues of staters of Lokris in central Greece, which often circulated in northern Greece. The reverse is perhaps inspired by the standard issues of Ainos, which also featured a lone standing animal, albeit a goat.

An Old Mistake Corrected

317. Dikaia. Circa 450-425/0 BC. AR Hemiobol (0.35 g, 12h). Head of nymph left / Head of bull right within incuse square. Schönert-Geiss, *Bisanthe* -; Traité IV 1439 corr., pl. CCCXL, 4; SNG ANS -. VF, porous. Extremely rare.

(\$200)

The entry for Traité IV 1439 is full of errors. While the description and photograph match this hemiobol, Babelon's recording of the size, weight, and reference to BMC Thrace p. 233, 4a, are for a completely different coin (the BMC obol, with a facing bucranium on the reverse). Schönert-Geiss, *Bisanthe* 18, the BMC obol, compounds the error by referencing Traité 1439 in her listing, without mentioning the error in Traité. Furthermore, the hemiobol type which is photographed and described in Traité is completely missing from Schönert-Geiss' corpus. As Traité only lists the BMC coin, the true reference for the photographed coin is unknown.

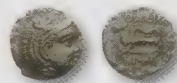

318. Pella. Circa 187-168/7 BC. Æ 17mm (4.13 g, 4h). Laureate head of Apollo right / Kithara; monograms to right. Touratsoglou, *Macedonia* 11; SNG ANS 587. VF, dark green patina.

A Thasian Colony at Krenides

319. Philippoi (as Krenides). 360-356 BC. Æ 10mm (1.10 g, 11h). Head of Herakles right, wearing lion skin / Club and bow; ΗΠΕΙΡΟ below. Bellinger, *Philippi* 2; Le Rider, *Thasiennes* 29; AMNG II/2, 1; SNG ANS 646. VF, rough dark brown surfaces. Very rare.

(\$500)

Krenides was a small colony of Thasos established on the plain of Philippoi, circa 360/59 BC (Diodoros, XVI 3.7). In 357 BC, these colonists appealed to Philip II of Macedon for aid against the local Thracians, who were attempting to oust the non-native Thasians (Stephanos of Byzantium, s.v. Φιλίπποι). Shortly after Philip defeated the Thracians, he refounded Krenides as Philippoi, and settled a number of Macedonians there, who soon began to issue coinage in the name of the new city. Two series of coinage have been attributed to the city's early period, while it was a Thasian colony. Both types feature the lion skin clad head of Herakles on their obverse and the legend ΘΑΣΙΟΝ ΗΠΕΙΡΟ (or ΕΠΕΙΡΟ). On the reverse, one series, only known in bronze, has a club and bow (as the present coin), while the other series, known in gold and bronze, has a tripod (Le Rider, *Thasiennes* 28-30). This second series is fundamental in establishing the placement of these coin at Krenides, as the staters are virtually identical in all respects to the staters of Philippoi, except for their ethnic. (See also B. Isaac, *The Greek Settlements in Thrace until the Macedonian Conquest* [Leiden: Brill, 1986], pp. 49-50.)

320. Terone. Circa 424-422 BC. AR Tetrobol (2.45 g). Oinochoe / Quadripartite incuse square. Hardwick group IV, 13; SNG ANS 751-4. EF, lightly toned, great metal.

KINGS of MACEDON

Conjectural Attribution

321. Alexander I. 498-454 BC. AR Diobol (1.69 g). Struck circa 480-470 BC. Forepart of goat right / Quadripartite incuse square. Raymond -; SNG ANS -; SNG München -; SNG Alpha Bank -; SNG Saroglos -; AMNG III/2, p. 137, 23 (uncertain Macedon); *Traité* I 1948 (Paros); Weber 1845 (Thrac-Macedonian); Leu 81, lot 174. Fine, porous. Extremely rare, possibly the fourth known. (\$500)

The attribution of this piece is still conjectural. With the exception of *Traité*, all references and prior sales have placed these coins, rightfully so, within the Thrac-Macedonian region, based on their fabric and style. The most obvious attribution would be to the Thrac-Macedonian tribe of the Mygdones or Krestones, but Lorber's study of their coinage (formerly given to Aigai) discounts such an attribution. Instead, Lorber convincingly argues for its placement among the issues of Alexander I, who used a similar goat forepart on the reverse of his early tetrachms, particularly those assigned to his second group (cf. SNG ANS 24-6). Although the dating of the present issue is given to correspond to this group, it is possible that it may also belong to his group I coinage, which featured a goat head on the reverse of some tetrachms (cf. SNG ANS 12-15).

322. Archelaos. 413-400/399 BC. AR Stater (10.72 g, 4h). Aigai mint. Group II, Series 1. Head of Apollo right, wearing tainia / Horse standing right, trailing rein, within incuse square. From Collection C.P.A.

The appearance of this coin corrects a misdating in the Alexander type coinage of Chios. In his die study of these issues, Bauslaugh placed the drachms with obverse die 50 into his Period 2 coinage (Price c. 270-220 BC). Although the drachms lacked the characteristic sphinx control mark of Period 2, he (albeit hesitatingly) placed them there based on their ME monogram, which was also found on tetradrachms that did have the sphinx control. The control marks on the present coin, however, a monogram above grape bunch, certainly belongs to Period 1, suggesting that all the drachms of die 50 should be placed in that period.

Mylasa or Kaunos - A Closer Look

390. Alexander III 'the Great'. 336-323 BC. AR Tetradrachm (17.07 g, 12h). Mylasa or Kaunos mint. Struck circa 250 BC. Head of Herakles right, wearing lion skin / Zeus Aëtophoros seated left; labrys in left field. Price 2074. EF, toned. Artistic obverse die. (\$1000)

From Collection C.P.A. Ex Gorny & Mosch 126 (14 October 2003), lot 1244.

Price was fairly certain that his issues 2073-6 belonged to Mylasa, based solely on their control marks. R.H.J. Ashton, however, argues that these same symbols also apply to the mint at Kaunos ("Kaunos, not Miletos or Mylasa," *NC* 2004, pp. 33-46). Regardless of the attribution, based on their style and fabric, Price's date of circa 300-280 BC is certainly too early for these coins, while Ashton's placement in the mid-3rd century is more likely.

Confirming Price's Placement

404. Alexander III 'the Great'. 336-323 BC. AR Tetradrachm (17.16 g, 3h). Tarsos mint. Struck circa 323 BC. Head of Herakles right, wearing lion skin / Zeus Aëtophoros seated left; in left field, dolphin upward; Θ below throne. Price 3035 corr. = Akçakale 47 corr. (same obv. die; symbol); Newell, *Tarsos* -. EF. Very rare issue, possibly the second known. (\$1000)

Price cited Akçakale 47 as the sole example for this issue, and its off-center strike prevented an accurate reading of its left field control. The present coin, struck from the same obverse die as the Akçakale specimen, clearly shows that the left field control is a dolphin. Price placed this issue at the end of a series that he dated circa 327-323 BC. All of the other tetradrachms of this series have a plow symbol on their reverse, while the following series, dated 323-317 BC, have a Nike. Regardless, Price's placement of the issue appears correct. The presence of the royal title suggests a date after 323 BC, and the style of the coin, particularly the obverse, is most similar to the latest plow and earliest Nike issues. At the same time, the style and fabric of the coin, as well as its presence in the Akçakale hoard, make a later placement, after the Nike series in 317 BC, unlikely. Thus, this coin most likely belongs between the two large groups, circa 323 BC, or shortly thereafter.

From Collection C.P.A.

Both Price and Duyrat show a break in this Phoenician-dated series after CY 45. However, Price missed the then-unique CY 54 coin that appeared in as lot 1655 in the 1970 Superior sale (= Duyrat 1248), and has the Aradian Alexanders resuming production with the Greek-dated series in CY 58. The present coin, struck from the same obverse die as the Superior coin, is apparently the second-known for this isolated Phoenician-dated year.

Seleukos accepted alliance with Keraunos and later defeated Lysimachos, only to be murdered in turn by Keraunos shortly thereafter. Having married Arsinoë and forged an alliance with Pyrrhos of Epeiros, Keraunos ruled for two years until his death fighting against the Gauls.

In his 1988 article on Rhodian imitations, R. Ashton has argued persuasively that this coinage was struck by Perseus to pay Cretan mercenaries serving in his army (see "A Series of Pseudo-Rhodian Drachms from Mainland Greece," *NC* 1988, pp. 29-30). Rhodian coinage circulated on Crete, where it was a familiar and trusted currency for the locals, and it is likely that they would have required payment in that form (see also Ashton, *SM* 146 (May 1987), p. 34).

A number of theories surround this enigmatic issue, unique in Larissan coinage. The most widely-accepted interpretations are those propounded by C. Seltman and M. Sordi. For Seltman (*Greek Coins*, p. 161), Aleuas (founder of the Thessalian ruling house) is depicted to promote the claim of Hellokrates, an Aleuad noble, against Alexander of Pherai in 361 BC. Supporting this contention is the legend on the reverse, ΕΛΛΑ, seen as a contracted form of Hellokrates. M. Sordi ("La drachma di Aleuas e l'origine di un tipo monetario di Alessandro Magno," *Annali* 3 [1956]), however, has dated this type to the reign of Alexander III of Macedon. Upon Alexander's accession, he became *lagas* of Thessaly, and Sordi suggests that Alexander issued this coinage to emphasize the joint ancestry of the Thessalian and Macedonian royalty, both of whom descended from Dodona in Epeiros. Sordi notes that, along with Epeirote coins, this type is also found on early issues of Alexander III of Macedon (the 'eagle' coinage, cf. Price pl. CXLIII). A secure date and historical context await further research or evidence.

Exceptional Offering of Thessalian League Coinage

Beginning about 1000 BC, the two plains of Thessaly, comprising a number of cities led by aristocratic families, were united in a federation under a single chief, or archon. The Thessalian League (or Confederacy) was created in the late sixth century BC by Aleuas the Red, who reorganized the state into a unity of four tetrads of four cities under the archon (also called *tagos*). Although the Thessalians were a dominant state in Greek affairs early in its life, the state became increasingly weak following the outbreak of internal rivalries in the fifth century BC. In the aftermath of the Lamian War, and further intrigues in the third century BC, Thessaly was effectively partitioned between Macedon and the Aitolian Confederacy, and was relegated to a setting for competing militaries, including the Romans. After T. Quinctius Flaminius declared Greek freedom in 196 BC, the Thessalian cities were liberated, and this occasioned the inception of the last Thessalian coinage series. This series, comprised solely of silver coinage in three denominations (stater, drachm, and hemidrachm/obol), was the first truly Thessalian League "federal" coinage. All issues bore the ethnic ΘΕΣΣΑΛΙΩΝ, along with the responsible magistrates' names, and were likely minted at Larissa, the capital of the League. The types employed were few, but all are familiar types appearing on various Thessalian coinages during the previous two hundred years: Zeus, Apollo, Athena Itonia (the "Thessalian Pallas"), and the bridled horse. Unfortunately, this federal coinage also was the last Thessalian coinage to ever be minted. The terminal date of the series is tied to the end of Thessaly proper, when it was incorporated by the Romans into the new province of Macedonia.

Hegesaretos of Larissa was a prominent Thessalian who was a partisan of Pompey. Other than that he was active in the years 63-49 BC, little is known of him today. He was mentioned by both Caesar and Cicero (Caes., *BC* III, 35, 2, and Cic., *Ad. fam.*, XVI, 25), and his name appears on a few of these Thessalian League staters. The present issue is significant in that it only mentions Hegesaretos' name alone; the upper legend on the reverse is certainly not a name, but its meaning is unknown. (See also B. Helly, "Le groupe des monnaies fédérales thessaliennes avec Athéna aux pompons," *RN* 1966, pp. 7-32).

Extensive Offering of Theban Magistrate Staters

The staters of the Boeotian Confederacy of the 4th century are well known to numismatists. These staters, struck on the Aiginetic standard, bear on the obverse the usual Boeotian shield and on the reverse an amphora, with the addition of magistrate names and, on occasion, vines hanging from the handles or extra symbols around the amphora. Although the coins do not bear the mark of an issuing city, Thebes, as hegemon of the Boiotian Confederacy, was most likely responsible for their issuance. In his study of the series, "The 4th Century BC Magistrate Coinage of the Boiotian Confederacy," *Numismatica Khronika* (1998), R. Hepworth has identified 44 different magistrates and 97 separate varieties. The series begins in the early years of the 4th century and ends at the Battle of Khaironeia in 338 BC.

The actual identities of most of the magistrates remain obscure. However, the magistrate abbreviated as EIIIIA or EIIAM has been identified as the historical Epaminondas (see "Epaminondas' Coinage," in *Proceedings of the 10th International Congress of Numismatics* (London 1986), p. 35-40), who, at the battle of Leuktra in 371 BC, successfully led the Boiotians against the invading Spartan army, thus ending nearly 300 years of Spartan military supremacy. Epaminondas would meet his death in 362 BC at the battle of Mantinea.

On the reverse die used to strike this coin, the O in the ethnic has been engraved over an Ω. One wonders what could be the reason for such a change on the die if we are dealing with the same magistrate. It would be understandable to produce dies with the same magistrate's name spelled in two or more different ways (and as just one example of this see for instance lots 482 as against 483/4/5 above), but if there is a change on the die from one way of spelling to another it means that it was necessary to separate the coins produced into clearly identifiable different lots and that this system, being quicker and more economical to apply, was preferred over the other option of engraving a totally new die

There are times when some of us wonder what the world would be like today if Alexander the Great had lived to a ripe old age. The same kind of "What if..." thinking could be applied to Epaminondas. His premature death on the battlefield of Mantinea in 362 BC deprived Thebes of its greatest statesman and soldier, signalling the start of Thebes' rapid decline into obscurity. If Epaminondas had lived to reap the benefits of his Mantinean victory he would have undoubtedly proceeded to unite all Greece under his leadership. The next step would be to turn to the North and face Philip who, instead of finding a divided Greece ready for the taking, would think twice before attempting to invade Thessaly. Whether then there would be a clash between the two emerging superpowers or a truce between them, is anybody's guess. Perhaps Philip would remember the years he spent as a hostage in Thebes and his respect for the Theban statesman would prevail. The conquest of Asia would then materialize sooner and in a more permanent manner. But, like most great soldiers, Epaminondas thought nothing of leading his men into battle and, instead of capitalizing on his genius, Thebes paid the price for his recklessness.

An Extensive Offering of New Style Tetradrachms

Around 165 BC, Athens introduced a new series of precious metal coinage. Colloquially called the "New Style Coinage" today, it represented a revolution in the coinage of Athens. Although it remained essentially an Athena/Owl type, this new coinage broke from the traditional, more archaic-style devices employed on the previous three centuries of Athenian coinage. The obverse now depicts the Athena Parthenos of Pheidias, wearing her triple-crested Attic helmet adorned on its visor with the foreparts of four or more horses, and a flying Pegasus on the bowl. On the reverse, the owl was now shown standing on a horizontal amphora, with an elaborate array of magistrates' names, symbols, and other letters in the surrounding fields. The entirety of the reverse was enclosed within a large olive wreath. These new depictions were largely facilitated by the coins' innovative flans that were far more broad, offering a larger canvas for the celator to fill. Unlike the previous two centuries, this coinage was produced on a large scale, as attested by its abundance in hoards. This uptick is generally attributed to Athens' recovery of the port of Delos in 166 BC. As with the fifth century issues, this New Style Coinage became an important and respected coinage in international trade, being found today at sites throughout the Mediterranean area, and was also imitated at a number of cities. The series reached its apogee in the early first century BC, but went into steep decline following Sulla's capture of Athens in the spring of 86 BC. Until then, the coins were produced in an unbroken annual sequence, but were now relegated to a few disconnected, sporadic issues that ultimately came to an end in the 40s BC.

This coin is from a massive issue that was struck in an apparent hasty manner, a fact suggested by the relatively crude dies that were often overused. Many of the known examples are poorly struck, another indication of haste. BCD suggested that this magistrate produced these coins around 31 BC, and that the elaborate, diadem-like wreath on the reverse was a reference to Agrippa's naval victory over the forces of Antony and Cleopatra.

From the BCD Peloponnesos catalog: "This coin...[is an example] of the kind of extraordinary innovative artistry to be found on the Arkadian League hemidrachms minted at Tegea. The attempts at perspective shown by the figure of Zeus seen from behind on the obverse and the successful facing or nearly facing heads on the reverses bear witness to the highly advanced engravers who produced the dies." The engraver of the facing head of Kallisto on the present coin has been identified as the same person who produced the dies for an exceptional coin now residing in the BN. The portraits engraved by this 'Paris Master' have been recognized as being among the finest early classical facing heads from the Greek mainland.

Amastris, a niece of Darius III of Persia, became a pawn in the complex dynastic quarrels that followed the death of Alexander. She had been given as wife to Alexander's general Krateros, but was dismissed when Krateros arranged a marriage for himself with the daughter of Antipater. Amastris then married Dionysos, tyrant of Herakleia, by whom she had three children before his death in 306 BC. In 302 BC she married Lysimachos of Thrace, who soon acquired a more profitable alliance by wedding Arsinoë, the daughter of Ptolemy I Soter of Egypt. Amastris then retired to the territory of Herakleia, where she founded a new city named after herself. She was not destined to find peace, however; in 288 BC her two covetous sons had her drowned and seized her city for themselves.

From the collection of Maj. Anthony F. Milavic, USMC (Ret.). Ex Giessener Münzhandlung 55 (14 May 1991), lot 252.

- 758. Kyzikos.** 5th-4th century BC. EL Hekte – 1/6 Stater (2.70 g). Head of youth left; below, tunny left / Quadripartite incuse square. Von Fritze I 143; cf. SNG France 294 (stater); Weber 4990. Good VF. Well centered on a broad flan. Extremely rare denomination for issue. (\$1500)

While the staters of this issue are relatively common, the sixth staters are particularly rare. Weber notes that at the time of its publication, the only other example known was in the Bibliothèque Nationale. This may have been in error as a sixth stater is not present in SNG France.

759. Kyzikos. Circa 390-341/0 BC. AR Tetradrachm (14.71 g, 1h). Wreathed head of Kore Soteira left, hair in sphendone covered with veil / Head of lion left; below, tunny fish left; amphora to right. 760. Lampsakos. Circa 500-450 BC. AR Diobol(?) (1.28 g). Forepart of Pegasus left, displaying both wings / Quadripartite incuse square of swastika pattern. Cf. SNG France 1118-9. VF, toned, porous, traces of find patina. Apparently unpublished. (\$200)

Issues with a Pegasus forepart and incuse are commonly known at a variety of mints. Argilos in Macedon is one possibility, but all of the known issues only display a single wing on Pegasus. Another, whose incuse style is most similar to this issue, is Corinth. However, these always include the city's *koppa* on the obverse, and this coin, which has ample space on its flan, clearly does not. Lampsakos remains the final possibility, and is the most likely. Although the style of the incuse is not typical for the city, the style of Pegasus is most similar, with both wings visible, and the head lowered towards its forelegs.

761. Lampsakos(?). Memnon of Rhodes. Mid 4th century BC. AR Drachm (3.04 g, 12h). Youthful head of Helios left on radiate solar disk / Rose with buds to either side; M-E flanking. Ashton, *Memnon* 26 (A13/P19); SNG Copenhagen 913 (Rhodes); SNG von Aulock 2769 (Megiste). VF, lightly toned, numerous cleaning scratches. Rare. (\$500)

Ex Erich Karl Collection (Lanz 131, 27 November 2006), lot 796; Giessener Münzhandlung 81 (3 March 1997), lot 349.

This series of "solar disk" drachms has been variably attributed to Megiste, Nisyros, and Euthana. Recent hoard evidence, as well as single finds, has prompted a reattribution of this issue to a location in the Troad, probably Lampsakos (See Ashton, *op. cit.*, pp. 11-15).

Known From Few Examples

762. Parion. Circa 165-143 BC. AR Tetradrachm (16.88 g, 11h). Head of Apollo right, wearing laurel wreath / Apollo Aktaios standing left, holding laurel branch and resting hand on bow; two monograms to inner left, ΑΠΟΛΛΩΝΟΣ ΑΚΤΑΙΟΥ around. Cf. Meadows, *Parion*, group 1, 1-2 (with altar on reverse and different monograms), otherwise unpublished. EF, lightly toned, minor die wear. Extremely rare type, this the sole example without altar, and the sole example not in a museum collection. (\$7500)

Ex Richard Winokur Collection (Triton X, 9 January 2007), lot 274; Gemini I (11 January 2005), lot 152.

These late civic tetradrachms of Parion are known from only a handful of coins, all in museum collections. While our variety, without an altar on the reverse to the left of Apollo, is unpublished, it shares a monogram with Meadows' coin 1, and may share the same obverse die of his coin 2. The overall characteristics of the flan and style are also consistent among these three coins, indicating a single brief issue.

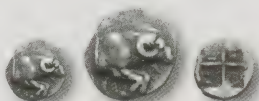

763. Pergamon. Circa 133-27 BC. Æ 20mm (8.55 g, 1h). Choreios, magistrate. Helmeted head of Athena right; XOPEIOY below (barely visible) / Nike advancing right, holding wreath and palm. SNG France 1800-2. Good VF, green-brown patina with patches of red. (\$300)

Early Staters From Teos

A member city of the Ionian Dodekapolis, Teos was a thriving seaport with two fine harbors. It was the birthplace of Anakreon the poet, Hekataios the historian, Protagoras the sophist, Skythinos the poet, Andron the geographer, and Apellikon, the preserver of the works of Aristotle. When the Persians under Cyrus invaded circa 540 BC, many Teians fled, resettling in Abdera. The griffin was the badge of the city of Teos, and is present on the coins of both cities.

793. Teos. Circa 510-475 BC. AR Stater (11.87 g). Griffin seated right, raising foreleg / Quadripartite incuse square. Balcer group I (A6/P8); Traité I 504 (same dies). Good VF, worn obverse die. (\$1500)

794. Teos. Circa 510-475 BC. AR Stater (11.71 g). Griffin seated right, raising foreleg; M E below, flanking other foreleg / Quadripartite incuse square. Balcer group IV corr. (A12/P16); SNG Copenhagen -; Traité I 500. Near EF, lightly toned. Overstruck on uncertain type. (\$2000)

Balcer failed to note the M on the obverses of his group IV staters (although it is clearly visible on his example 12b = Traité I 500).

795. Teos. Circa 510-475 BC. AR Stater (11.91 g). Griffin seated right, raising foreleg; grape cluster before / Quadripartite incuse square. Cf. Balcer group IV (for rev. die, P16), otherwise unpublished. EF. Unpublished with grape cluster symbol alone. (\$3000)

Balcer group VII has a grape cluster paired with a leaf, but the style of the griffin is significantly different.

796. Teos. Circa 510-475 BC. AR Stater (11.90 g). Griffin seated right, raising foreleg; E before / Quadripartite incuse square. Cf. Balcer group X (for rev. die, P33), otherwise unpublished. Near EF. (\$2000)

Balcer group IV is listed as having an E alone, but this was in error; his obverse die 12 had an M below the griffin's belly (see lot 788, above).

797. Teos. Circa 510-475 BC. AR Stater (11.71 g). Griffin seated right, raising foreleg; swan before / Quadripartite incuse square. Balcer group V (A-/P19 [unlisted obv. die]); SNG Copenhagen 1437 (same rev. die). Near EF. (\$2000)

798. Teos. Circa 510-475 BC. AR Drachm (5.81 g). Griffin seated right, raising foreleg / Quadripartite incuse square. Balcer group XX, 37b corr. ("A37"/P59); SNG Copenhagen 1433. Good VF. (\$750)

Balcer lists coins 37a and 37b as both being struck from the same obverse die, A37. An examination of his illustrated examples, however, clearly shows that this was in error.

799. Teos. Circa 510-475 BC. AR Drachm (5.92 g). Griffin seated right, raising foreleg / Quadripartite incuse square. Balcer group XX (A40/P62); SNG Copenhagen 1433. Good VF. (\$750)

800. Teos. Circa 510-475 BC. AR Drachm (5.96 g). Griffin seated right, raising foreleg / Quadripartite incuse square. Balcer group XX (A41/P63); SNG Copenhagen 1433. Good VF. (\$750)

Teos collectors please note that Balcer's obverse dies A41 and A44 are the same.

VF, green patina, hairline flan crack, light earthen encrustation. (\$200)

In expiation for his murder of Iphitos at Tiryns, Herakles was compelled by the Delphic oracle to serve Omphale, the queen of Lydia, for one year. During this time, he performed a number of labors, similar to those which he undertook while serving Eurystheus, including the capture of the Kerkopes, the killing of the Syleus, and the conquest of the city of the Itones. At the same time, he was forced to wear women's clothing and spin wool and, according to the poet Ovid (*Fasti* 2.305), at one point during this time, Omphale even wore Herakles' lion skin and carried his club while ordering him about. However, these actions seemed to have little ill-effect on the hero; after his year's service was completed, Herakles married Omphale.

- 822. Hekatomnos.** Circa 392/1-377/6 BC. AR Diobol (1.50 g, 3h). Mylasa mint. Bearded head of Hekatomnos right / Forepart of bull left; Ξ on shoulder. Winzer 13.1; SNG Copenhagen -; Traité II 2494 (as Pergamon). VF, some porosity, irregular flan. Fine style. Very rare. (\$300)

As part of the Achaemenid Empire, Caria in the fourth century BC was under the rule of a family of semi-independent satraps known collectively as the Hekatomnids, named after the dynasty's founder, Hekatomnos. A native of Mylasa, Hekatomnos was appointed satrap of Caria after the fall of Tissaphernes, with orders that he provide forces which would assist the Great King in his recovery of the island of Cyprus. According to Diodorus Siculus (14.98) Hekatomnos was placed in command of the fleet for this operation. Though there exists some doubt about Hekatomnos' loyalty to the Achaemenids, such doubts did not prevent him being given control of Miletos, one of the most important Ionian cities, certainly his in 386 BC under the terms of the King's Peace. The clear Milesian influence on his coins suggests that Hekatomnos struck these coins there. Interested in Hellenic culture (though, possibly hedging his diplomatic bets), Hekatomnos sent his youngest son Pixodaros to Athens as part of a deputation; his older son was bound by *xenia*, or guest friendship, with Agesilaus, king of Sparta. When he died in 377 BC, Hekatomnos' son Maussollos succeeded him, soon in turn to be followed by his other sons, Hidreus and Pixodaros.

The issue of the magistrate Gorgos with the bow-in-bow case symbol (Ashton 288), is among the most common for this period. The present coin, however, is significantly different in two respects. First, the obverse has the head of Helios facing directly forward, rather than being turned slightly to the right. Also, the magistrate's name is inscribed in the genitive form, rather than the usual nominative. These variances from the norm suggest this coin may be part of one of the many "pseudo-Rhodian" issues from Greece or elsewhere.

The Plinthophoric Coinage of Rhodes

This late series of silver fractions was among the longest-running of all the Rhodian series. Its types continued from that found on previous issues. Helios was adopted as the patron deity of Rhodes upon the city's foundation in 407/7 BC, and became the nearly universal obverse type of Rhodian coinage over the following four centuries. The rose was a pun on the city's name, a common practice in Greek coinage, and also was the dominant type on the reverse of Rhodian coins until the first century AD. The plinthophoric series runs from circa 190 BC to 84 BC, and represents a complete overhaul of the monetary system, in which the traditional Rhodian standard was abandoned in favor of a new standard based on a 'plinthophoric' drachm of around 3 grams, which was more commensurate with other currencies of the time. Another innovation was the abandonment of all denominations higher than a drachm, and a proliferation of regular issues of hemidrachms and diobols. As mentioned above, the types remained the same, but certain details were altered. On drachms and diobols Helios was now more often portrayed in profile, rather than facing, and the facing portraits on hemidrachms were now radiate. The reverse design was placed into a shallow incuse square, which is where the name of the series is derived (πλινθος = brick or ingot). The exact reason for this major reorganization of Rhodian coinage is not known for certain, but the prevalent theory is that it was undertaken to conform to the changes extant under the terms of the Peace of Apameia in 188 BC. Whatever the reason, this change was enduring, with the series lasting nearly 100 years. The plinthophoric coinage came to an end during the First Mithridatic War, during which the Roman survivors of the Vespers of 88 BC fled to Rhodes, which was subsequently besieged by the Pontic king. The siege lasted for six months, during which time the silver supply dwindled to such low quantities that the coinage was supplanted by issues of large-denomination bronzes (see Ashton, *Coinage*, pp. 61-5).

This piece is certainly associated with the similar issues at Pamphylian Side (SNG France 632-58) and Cilician Holmoi (SNG France 120). The Side issues all carry the city emblem, a pomegranate, in the obverse left field, and Atlan places the inscribed issues circa 370-333 BC. Similarly, the Holmoi issues all have a dolphin emblem in the obverse left field, though not a civic badge, and are dated by Casabonne circa 380-375 BC. While the snake on the present coin may indicate the mint of issue, this is unlikely, as no city in the region used a serpent as a civic emblem during the period in question.

Extremely Rare Ake-Ptolemais Tetradrachm

903. Antiochos V Eupator. 164-162 BC. AR Tetradrachm (13.11 g, 1h). Ake-Ptolemais mint. Diademed head right; AB monogram behind / Eagle standing left on thunderbolt; palm frond to left, HP monogram between legs. SNG Spaer -; cf. Brett 1 (fourrée); SC II 1583b (forthcoming). Good VF, minor porosity. Extremely rare, possibly unique. (\$7500)

Antiochos V struck two series of tetradrachms from Ake-Ptolemais, differentiated by the monogram between the eagle's legs. The monograms appear to be formed of HP and ΑΓ, respectively. The two known tetradrachms with the HP monogram cataloged by Brett, however, were plated contemporary forgeries. Houghton and Lorber contended that these were likely contemporary forgeries copied from official pieces which had yet to be discovered. Recently, a tetradrachm with the ΑΓ monogram appeared (lot 395 in Triton X) that clearly displayed traces of the HP monogram below the ΑΓ monogram, proving their theory. The present coin, however, is the first known with the HP monogram intact.

The Maltiel-Gerstenfeld Menorah Bronze

- 931. Hasmoneans. Mattathias Antigonus.** 40-37 BCE. Æ Lepton (1.28 g, 12h). Showbread table / Menorah. Meshorer 41; Maltiel-Gerstenfeld 58 (this coin); Hendin 485. Near VF, dark brown patina, light roughness. Very rare, less than 20 known. (\$5000)

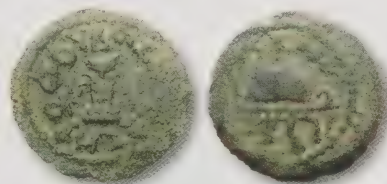

From the Macleay Collection. Ex Maltiel-Gerstenfeld Collection, 58.

This is the first and only representation showing the two most prestigious cult vessels of the Temple on an ancient Jewish coin, the Menorah (candelabrum) on one side and the Showbread Table on the other, being the original ones as seen prior to the Temple destruction in 70 A.D. It is, indeed, the earliest datable object picturing these articles in Jewish art. This coin is unique in all of ancient Jewish coinage, in that it shows articles used in Temple worship. It was produced differently from the bulk of the coins of Antigonus, and also the weight standard appears to be much lighter. The golden table (Showbread Table) was placed near the Menorah and with the Menorah, a companion article in services. It is quite likely that the Showbread Table does not receive the veneration that the Menorah does in modern times, because of the importance of bread and the Lord's Table in Christian services. The rule of Mattathias as High Priest commenced in 40 B.C. and by 37 B.C. Herod I, threatened to end five generations of Hasmonean rule. The Jewish population was afraid of the turn of events and Antigonus issued this unique coin type, during the siege of Jerusalem. The depiction of these objects is forbidden in the Babylonian Talmud; "A man may not make a house after the design of the Temple, a courtyard after the design of the Temple, a table after the design of the table (in the Temple), or a candelabrum after the design of the candelabrum (in the Temple)." Interestingly, this paragraph singles out the Menorah and the Showbread Table from all the objects in the Temple and forbids their reproduction. It is also interesting that they are mentioned in a single category. Meshorer observes that it was not until the third century A.D. that the Menorah became the most important Jewish symbol. "Thus the depiction of the image on this coin minted as early as the reign of Antigonus is a remarkable and daring phenomenon, which must be seen in the context of the contemporary historical circumstances. Antigonus may have depicted these objects on his coins both to encourage his supporters and to remind the people of their duty to preserve the sanctity of the Temple (and its High Priest) from the foreigners." This specimen, the most sought after of Jewish coins rarely appears on the market. Curiously it is the most expensive object in copper for any known artifact, by weight. The most recent sale examples are the Bromberg specimen (Superior, Dec. 5, 1991, lot 19, which appears to be from the same dies as this specimen and realized US\$27,500), and the Abramowitz Family Collection specimen (Superior 8 December 1993, lot 12, which realized \$31,900). While this example is off centre and shows almost no representation of the Menorah it has as fine a Showbread Table as any on all the known specimens.

- 932. Herodians. Herod I (the Great).** 40-4 BCE. Æ 8 Prutot (7.83 g, 12h). Samaria mint. Dated RY 3 (40 BCE). *Lebes* above tripod; date to left, monogram to right / Military helmet; star above, palm to left and right. Meshorer 44; Hendin 486. Good VF, green sandy patina. (\$500)

The helmet on the reverse of this type has been the subject of much research. Initially called a vessel by Madden in 1864, others, like Kindler in 1974, refer to it as a *thymaterion* (an incense burner), but Meshorer and Hendin now believe it to be a helmet. Its confirmation as a helmet was presented by Hendin in the Israel Numismatic Journal Vol.11 in which he showed that, through the analysis of a superb specimen, there was a wreath on the helmet which included a large leaf as a central device. Thus, he concluded that the object is a soldier's helmet with a wreath, cheek pieces, and straps. Leaves on helmets were a suitable symbol and design motif at this time as Herod I did not depict human images on any of his coins

UNCERTAIN EAST

- 982.** Early 4th century BC. AR Tetradrachm (17.80 g, 5h). Imitating Athens. Helmeted head of Athena right / Owl standing right, head facing; olive sprig and crescent behind; all within incuse square. Unpublished. Good VF, light cleaning marks. Exceptional early imitation. (\$1000)

Ex Classical Numismatic Group 72 (14 June 2006), lot 986; Malter LXIX (3 June 1996), lot 184.

The high quality of this imitation, as well as its fabric, suggest a mint in either Phoenicia or Philisto-Arabia

- 983.** 3rd century BC. AR Drachm (3.77 g, 10h). Imitating Alexander III of Macedon. Head of Herakles right, wearing lion skin / Zeus Nikephoros seated left; in left field, eagle standing left; monogram below throne. Apparently unpublished. VF, toned, struck from worn obverse die. (\$150)

The absence of a name, and the crude execution of the obverse die strongly suggest that this is a local imitation of an Alexandrine type drachm. The cupped shape of the reverse die is characteristic of issues struck in the far east during the reign of the Seleukid kings Seleukos I and Antiochos I. Another interesting aspect of this coin is the representation of Zeus Nikephoros, rather than Zeus Aëtrophoros on the reverse. This type was introduced to the Alexandrine coinage by Seleukos I circa 305/0 BC, and also supports an eastern origin for this enigmatic piece.

Although coins depicting this god are extremely rare, Asaeixso was an important deity in the Iranian pantheon. As one of the higher deities who furthered or strengthened creation and those thing which were bounteous and holy, Asaeixso would be a natural addition to the Kushan pantheon. He is the embodiment of righteous truth as well as a defense for the righteous against death, illness, and their enemies. As he is said to receive prayers intended for Ahura Mazda, he serves as a divine mediary between this world and heaven. Asaeixso is often invoked in connection with other gods, such Mano for prosperity. His association, however, with Atar, the personification of fire, is more frequent, and represents not only the fire which purges unrighteousness, but also the hearth-fire which unites the family.

ISLANDS off ELIS

From the Patrick Villemur Collection.

RPC, echoing Grueber and Bahrfeidt (who later recanted), tentatively places this issue at the "town of Cephallenia." This cannot be correct, for there was no town of this name on the island. Thus, if they are reading the monogram correctly, it must relate to the island as a whole. Otherwise, the earlier attribution to Kranion, or M. Grant's reading of Ithaca, may be correct. In this catalogue's opinion, the monogram of this type is not so far removed from that on the issues RPC ascribes to Kranion with certainty (cf. RPC 1360-1).

The Crassus who issued this coin is almost certainly Marcus Licinius Crassus, the eldest son of Crassus the Triumvir and Caecilia Metella. One of the greatest problems facing Domitian toward the end of his reign was the lack of an heir – a problem which he solved by adopting two of his great-nephews, the sons of his niece, Domitilla. Possibly fearing the legitimacy of rival heir Titus Flavius Clemens, nephew of Vespasian and husband of Domitilla, Domitian exiled Flavius along with his wife to Pandateria on charges of atheism. As nothing further is recorded about either adopted heir, it can be assumed that both were punished in some way for the supposed crimes of their parents.

An equestrian and confidant of Augustus, Vedius Pollio seems to have had an important administrative career, serving in the restoration of a proconsular government in Asia and possibly even in the refoundation of Tralles as Caesarea. Other than his name, little else is known about the Marcellus depicted on this issue is uncertain. Certainly he held office worthy of this coinage, but during this period, no Marcellus is known to have served as a proconsul in Asia, nor is there any other reference to such an individual having served in any other important capacity. The only possibility that seems plausible is that he was a legate dispatched to attend to some important duty in Asia in the mid-1st century AD.

From the Patrick Villemur Collection. Ex Sternberg XXV (25 November 1991), lot 154.

Paullus Fabius Maximus, of the famed patrician *gens Fabia*, had served as consul in 11 BC. His time as proconsul in Asia is firmly set by the details of a solar calendar that he introduced in Asia during his tenure there (V. Ehrenberg and A.H.M. Jones, *Documents Illustrating the Reign of Augustus* [Oxford, 1976], pp. 115-6). Paullus Fabius was a close friend of Augustus, and his wife, Marcia, was a first cousin of the emperor. There is speculation that he committed suicide after being linked to the controversy surrounding Julia the Elder. His brother, Africanus Fabius Maximus, was consul in 10 BC, and his portrait also appears on provincial coins, as proconsul in Africa (see lot 1551, below).

The reverse of this coin recalls the second major conflict of Zeus' rise to power. After he had defeated the Titans in the Titanomachy and apportioned their former relatives to his fellow Olympians, he was compelled to resolve a conflict with the Giants, offspring of Gaia and Cronus. Known as the Gigantomachy, these chthonic half-man, half-serpent creatures attempted to wrestle power from the Olympians by casting them out of Olympus. To accomplish this, the Giants attempted to reach Olympus by heaping up one mountain range on top of the other. From above, Zeus and the other Olympians defended themselves by hurling their weapons. In the end, however, it was the assistance of Hercules, that won the day. With the final defeat of the Giants, the rule of Zeus was no longer challenged.

While the early imperial coinage of this city is not well-known, owing to the great rarity of its examples, this issue in particular, proves to be the most enigmatic. Because of the inclusion of civic years on the coins, our specimen is known to be part of a type which was struck during the reigns of both Gaius and Claudius. As to whom the portraits represent, there has been much scholarly debate. Ruprecht Ziegler (*Städtisches Prestige und kaiserliche Politik*, p. 17), suggests the portraits are Alexander III of Macedon and Julius Caesar respectively, as the founders of the city.

The similarity of this coin's reverse to that of Aesillas led to the earlier attribution of this issue to Macedonia. Unlike the more typical club of Hercules, the presence of a spear (*hasta*) suggested the issuer to be an as-yet-unknown quaestor *propraetore*, who, unlike Aesillas, would have held the power of *imperium*. Based on this assumption, Grant gave the issue to M. Acilius at Thessalonica, whom he tentatively identified as Caesar's governor of Macedonia in the final year of the Dictator's life. The style of the portrait is identical to a coin of the possible Cilician Colonia Iulia Veteranorum (RPC 4082). That coin bears the additional obverse legend *PRINCEPS FELIX*, a title which clearly identifies the portrait as Augustus. Imhoof-Blumer and Grant both assigned the aforementioned issue and our coin to the southwestern areas of the Black Sea, but to date no specimen of our coin has turned up in sites there, as one might expect if that region were its point of origin. The patination, typical of Syria, may lend support for locating this coin there; at present the lack of conclusive evidence seems to preclude a more certain attribution.

1398. Uncertain. Augustus. 27 BC-AD 14. Æ 20mm (8.12 g, 12h). Bare head right / [Spear], *sella quaestoria*, and fiscus; Q below sella. RPC 5410.7 (this coin); AMNG III 228 (Q. Bruttius Sura); FITA 13-19 (Thessalonica[?]). Near VF, black-green patina. Rare. (\$150)

1399. Uncertain. Divus Augustus. Died AD 14. Æ 25mm (10.20 g, 12h). Bare head right / ΘΕΟΝ ΑΥΤΟΚΡΑΤΟΡΑ [ΤΟΡΑ], capricorn right, holding globe, bearing cornucopia on back. RPC Supp. 1, 5423/1.5 (this coin). VF, black-green patina. (\$150)

From the Patrick Villemur Collection. Ex Freeman & Sear 3 (10 December 1996), lot 724.

While Grant in *Essays Mattingly* posited a mint in Cilicia for this coin's origin, his hypothesis is far from conclusive. The similarity between this coin and RPC 5448 suggests they are part of the same issue, possibly struck shortly after the accession of Tiberius to the throne and the deification of Augustus, as evidenced by the legend, ΘΕΟΝ ΑΥΤΟΚΡΑΤΟΡΑ [ΤΟΡΑ].

Galerius Antoninus

1404. Uncertain. Diva Faustina Senior, with Galerius Antoninus. Died AD 140/1 and before AD 138. Æ 27mm (8.34 g, 1h). Struck circa AD 147. ΘΕΑ ΦΑΥΣΤΙΝΑ, veiled and draped bust of Diva Faustina Senior right, wearing stephane / Μ ΓΑΛΕΠΙΟC ΑΝΤΩΝΙΝΟC ΑΥΤΟΚΡΑΤΟΡΟC ΑΝΤΩΝΙΝΟV VΙΟC, bare-headed and draped bust of Galerius Antoninus right. Overbeck, *Galerius* 14; SNG Copenhagen -; Lindgren III 940; Cohen 2 (Galerius and Faustina). VF, olive surfaces, spots of porosity. Very rare. (\$1000)

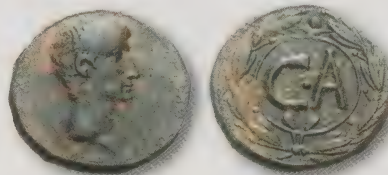

This issue raises three important questions. The first regards where it was minted. While the general consensus assigns it to a mint in Cyprus, this attribution is tenuous, and Crete, the northern Balkans, and Rome itself have been suggested as equally plausible alternatives. The second question regards its strike date. If the obverse legend for this coin follows the pattern set at Rome, then this coin had to be struck after 147 AD when the DIVA FAVSTINA obverse legend was instituted. The third question then regards the purpose for which this coin was struck. Galerius Antoninus was the natural son of Antoninus Pius and Faustina Senior. When he had died before his father had been made Caesar, Hadrian compelled Antoninus Pius, now without any natural son, to adopt Lucius Verus, the son of Hadrian's previous Caesar, and Marcus Aurelius as his own sons and heirs. In AD 147 Faustina Junior, Antoninus Pius' only surviving child was created Augusta upon her marriage to Marcus Aurelius. In the flurry of issues struck to commemorate this event and the formation of a new dynasty, it is quite possible that this issue was struck to commemorate the young boy's premature death and include him in an as yet uncertain way into the new imperial scheme.

The Coins of Roman Antioch

The first single comprehensive catalog of the complex Roman provincial coinage of Antioch, this book synthesizes the wide-ranging scholarship on the subject to date into one single volume. Divided into three parts, the first gives an overview of the coinage, including what specifically constituted the Roman provincial coinage of Antioch, and the different categories of coins struck. The first part concludes with a discussion of the types found on the coinage, including letters and pellets, as well as excurses on evidence for attributing particular issues to Antioch, metrology, dating, production figures, countermarks, and forgeries. The second part lays out the denominations of the bronze coinage assigned to Antioch.

The catalogue of coins comprises the third part and traces the coinage from the period following Pompey's annexation of Syria in 64 BC through the imperial issues of Valerian. Divided between civic and imperial issues, the catalogue of civic coins includes the revived civic issues of Antioch struck in AD 312 during the Great Persecution. The catalogue of imperial coinage, beginning with Antony and Cleopatra, presents each emperor's coinage by general type,

followed by their respective subtypes and varieties, all of which are accompanied by illustrations and introductory commentary. Each coin is also assigned a rarity value based on specimens known to the author.

Four appendices complete the book. Appendix 1 lists countermarks found on the aes coinage, with each one cross-referenced to its appropriate Howgego number. Appendix 2 notes the provenance of each illustrated coin. Appendix 3 provides a concordance chart for each general type to Butcher, while Appendix 4 illustrates addenda to the catalog, including each coin's weight, die axis, and size, as well as any relevant die links. Finally, a bibliography of the works cited lists the relevant numismatic works that form the basis of the study.

This well-researched book will be the new standard reference for the provincial coinage of Antioch, and will prove beneficial not only to numismatists and collectors, but those interested in this important provincial city.

Although the main Pythian Games were held at Apollo's sanctuary at Delphi, many other cities throughout the eastern portion of the Roman Empire periodically held smaller versions of this event. Like their Delphic original, these smaller versions included a number of athletic contests, as well as music and poetry competitions. Often such events were associated with other deities, based on the important civic cults of each city. At Heliopolis (mod. Baalbek), the site of a massive temple complex dedicated to Jupiter-Zeus-Baal-Hadad, Venus-Aphrodite-Astarte, and Bacchus-Dionysus, these games were known by the as the *certamina sacra Capitolia Oecumenica Iselastica Heliopolitana*. Here, celebrations were held in honor of Jupiter-Zeus-Baal-Hadad, not only associating this god his counterpart at Rome, but also the city with the Empire as a whole. Owing to the rarity of this issue, it is possible that these games were held in the presence of Valerian himself, who was certainly in the East at this time, preparing for his war against the Sasanians. Consequently, Heliopolis could feel especially honored at its presence for this for this important moment upon the imperial stage.

Serapis was a syncretic god, combining Hellenistic Greek and Egyptian religious beliefs. His name is of Egyptian origin and derives from a synthesis of Ausar (Greek, *Osiris*), the Egyptian god of the Underworld, and Hapi (Greek, *Apis*), a manifestation of the god Ptah. Under the Ptolemies, Serapis became the chief tutelary god and the subject of a royally-sponsored cult, whose emphasis on an afterlife made the worship of Serapis one of the more popular mystery cults. His immense popularity soon extended his creation as Serapis-Pantheos, a hybrid deity incorporating other divine elements. In Alexandria a large temple complex, called the Serapeum was constructed and remained highly patronized well into the fourth century AD. Shortly after the imperial decree of AD 391, officially declaring pagan temples closed, the Serapeum was besieged, plundered and destroyed.

After serving in his administrative role in Africa, P. Quinctilius Varus went on to serve as governor of Syria and later occupied Jerusalem where he crucified 2,000 Jewish rebels, an act which aided to generate anti-Roman sentiments throughout the area. His second marriage to Claudia Pulchra, grand niece of Augustus. However, it was the battle at the Teutoburg Forest in AD 9 which forged the memory of Varus, as it was here that he lost three Roman legions as well as his life to the revolting Germanic tribe.

Africanus Fabius Maximus, who was consul in 10 BC along with Iullus Antonius, second son of the triumvir and his first wife, Fulvia, was the brother of Paullus Fabius Maximus, consul of the previous year, and whose portrait also appears on provincial coinage while serving as proconsul of Asia (see lot 1342, above). Africanus was himself proconsul of Africa in 6-5 BC, and also served as a member of the *septemviri epulonium*, one of the offices normally held as part of the *cursus honorum*. One of the four *quattuor amplissima collegia* originally held by Roman pontiffs, the *septemviri epulonium* were a *collegium* of seven men whose purpose was to arrange public banquets at various festivals and games held in Rome. Owing to its religious overtones, participation in this office allowed those citizens to whom the offices of augur, pontifex, or *quindecimvir sacris faciundis* were closed the opportunity to have some religious participation as part of their career.

This moneyer, presumably the quaestor of 48 BC, here honors his most famous ancestor, the holder of five consulships and one of the principal Roman heroes of the Second Punic War. The triskeles alludes to his conquest of Sicily in 212-210 BC, the spoils from which rescued the state from imminent bankruptcy. The reverse type commemorates his *spolia opima*, the arms won in 222 BC when, as consul, he slew an Insubrian chieftain with his own hands in the course of the Roman conquest of Cisalpine Gaul.

1702. Æ Quadrans (3.19 g, 10h). Mint in Gaul (auxiliary mint of Lugdunum). Struck circa 10 BC. Laureate head right / Eagle standing facing with wings spread, head left. RIC I 227; Lyon -; RPC I 508. VF, dark green patina. (\$150)

1703. Æ Quadrans (3.15 g, 4h). Mint in northern Gaul; Germanus Indutilli L., magistrate. Struck circa 10 BC. Diademed male head (Augustus?) right / GERMANVS above, INDVTILLI • L • in exergue, bull butting left. RIC I 249; RPC I 506; D&T 707. VF, handsome, two-tone green patina, minor porosity, hairline flan crack. (\$150)

This coin was apparently struck in northern Gaul by a local Roman official, Germanus Indutilli L. At the time, the previous local coinage, of Celtic origin, had been removed from circulation, and was to be replaced by Imperial currency. It is thought that this issue was struck as an exigency before the arrival of the official coinage from Lugdunum, upon whose types this issue is based.

Posthumous Issues

1704. Æ Tessera (4.64 g, 8h). Struck under Tiberius, circa AD 22-37. Laureate head of Augustus right within circular ring; [all within wreath] / VII within beaded border; all within wreath. Cf. Extremely Rare Restitution Issue

1705. AR Denarius (3.62 g, 9h). Restitution issue. Rome mint. Struck under Trajan, circa 98-117 AD. Laureate head right / Gaius and Lucius Caesar standing facing, each resting hand shield set on ground; behind the shields, two crossed spears; above, on left, a simpulum left, and on right, lituus right. Cf. RIC I 208; cf. Lyon 82 var. (simpulum and lituus turned inward). VF, toned, shallow cleaning scratches beneath tone. Very rare. (\$500)

The style and fabric of this coin suggest that it belongs to an anonymous restitution issue of either Trajan or Hadrian. The restitution issues of Trajan are well known since the coins are marked with Trajanic legends. The fact that this coin retains its original legend without any mention of the issuer suggests that it is not part of the great restitution series of Trajan, but part of an earlier or later anonymous issue. Apart from style, on all known specimens the lituus has a split base and is turned to the right, and the simpulum is large, rather bulbous and turned to the left, features not seen on the issues of Augustus. Only five other specimens have appeared at auction in the last decade, the first in the Gil Steinberg Collection (*Numismatica Ars Classica*, 16 November 1994), lot 181, the second in *Numismatica Ars Classica* 8 (3 April 1995), lot 754, the third in *Triton I* (2-3 December 1997), lot 1283, the fourth in *CNG* 63, (21 May 2003), lot 1213.

Although the first of these three rare coins, the British Museum piece, was cataloged in the first edition of RIC I, it was left out of the revised edition. In that edition, Giard notes (p. 110, note *) that the BM piece was a misreading of TR POT III COS III. In fact, the first edition was correct, the piece was not misdescribed. The second known example of this type was sold as lot 56 in the Bourgey sale of 17 December 1913. Ironically, Bourgey misdescribed that coin as TR POT III COS III.

NERVA

Domitian's assassination in AD 96 placed the elderly senator Nerva on the throne. He took an interest in the well-being of the populace and instituted a number of popular reforms: he released those imprisoned for treason, banned future prosecutions for treason, granted amnesty to many whom Domitian had exiled, restored much confiscated property, and involved the Roman Senate in his rule. His mild ways and refusal to execute the murderers of Domitian caused some disaffection within the military, among whom Domitian had enjoyed considerable popularity. This reverse type reflects Nerva's recognition that he needed to placate the army and navy, whose support he eventually gained by adopting Trajan.

Aureolus was an extraordinarily capable general who served under Valerian and Gallienus. Around AD 258, Gallienus stationed a new cavalry unit at Mediolanum that was to serve as a quick reaction force against any new invasions along the frontier of the central empire. Aureolus was given command of this unit. In AD 260-261 his forces defeated the armies of the usurpers Ingenuus and Macrianus, and recovered the province of Raetia. Following these victories, Gallienus and Aureolus led a Roman army against the breakaway Gallic provinces under Postumus. Gallienus was forced to leave the field after being injured in battle, and left the campaign in the hands of Aureolus. Aureolus ended the campaign shortly thereafter, and while the reason is uncertain, the historical record suggests it was due to either his incompetence or else treachery (he had come to a secret agreement with Postumus). While the former seems unlikely, given Aureolus' record, the latter is possible, as there are indications that he had been preparing for a revolt as early as AD 262. Regardless, at some point in AD 267, Aureolus revolted and established his base at Mediolanum, where Gallienus besieged him in AD 268. The details of the revolt are unclear, but it appears that Aureolus first appealed to Postumus for aid, and, failing to gain the Gallic Emperor's support, declared himself emperor. About the same time, Gallienus was murdered, and was succeeded by Claudius II Gothicus, who continued to besiege Mediolanum. Soon, though, it appeared that an agreement was reached, and Aureolus emerged from the city to meet Claudius. Any such concord, however, was simply a ruse, as Aureolus was taken into custody and executed.

Ex Robert Schonwalter Collection (Triton V, 15 January 2002), lot 2111.

The reverse of this medallion depicts the tres Monetae, female personifications of the three metals of gold, silver, and bronze, and commemorates the attempt of Claudius II to reform Roman currency. When Claudius II took the throne on the death of Gallienus in AD 268, the Roman Empire had reached its lowest point. In addition to the numerous internal and external rebellions, the economy was in a state of near-collapse. While gold aurei still continued to be struck in order to pay the army, silver denarii and antoniniani, as well as the earlier large bronze denominations, had disappeared completely. In their place, antoniniani of near-billon composition became the medium of daily exchange. These too, however, soon diminished in size and style. Claudius II seems to have planned a reform of the currency, and he also began minting a wide variety of reverse types which emphasized traditional divine protection and renewal of Roman power. Unfortunately, the early death of Claudius II delayed the anticipated monetary reformation, which his successor, Aurelian, would carry through.

Although it is not differentiated in RIC, a comparison of these two coins shows that there are two varieties in this issue. While lot 1842 has the traditional camp gate depiction, lot 1841 has an additional line running behind the crenellation at the top of the camp gate. This is probably an attempt by the celator to display the camp gate in perspective from above, akin to that on many of the city gate argentei.

RIC VI -. EF, dark green-brown patina. Unique and unpublished. (\$2000)

This coin presents numerous difficulties. First, the reverse type is completely unknown in bronze at any mint; it only appears in gold. While problematic, the appearance of a new reverse type in bronze is not impossible. The second difficulty regards the mintmark. This broad, thin-flanned follis must belong to the issues of circa May AD 310 - May AD 311, as the folles became compact and thick afterward. However, according to RIC, all of the *aes* issues for this period contain an "altar" in their mintmark, usually in the left field. It is certain that such a mark was not erased, or otherwise removed, from this coin. Nonetheless, as the reverse type is novel, it is possible that this symbol may be missing on this particular issue from this period. The third, and final, difficulty is most significant: the reverse legend commemorates the "seventh" consulship of Maximinus, but Maximinus was only consul twice, in AD 307 (while as Caesar) and AD 311 (as Augustus). A possible solution would be that the reverse is a hybrid from one of the other Augusti, but none of the others held their seventh consulship during Maximinus' reign. Galerius did hold his eighth consulship jointly with Maximinus in AD 311, but it is clear that the numeral in the reverse legend does not contain a final "I" that would be needed for this coin to be a hybrid with a previously-unknown reverse type of Galerius. As this coin does not appear in any respect to be a modern forgery, and it was apparently found among a large hoard of folles, the only possibility remaining would seem to be that it is a contemporary forgery. However, it would be very unlikely that a forger would make a novel type that would be more difficult to pass off compared to a copy of a common issue. This certainly is a remarkable coin worthy of detailed, in depth study.

VF, area of flat strike, a few nicks. Very rare, only the second handled by CNG, none in CoinArchives.com. (\$500)

One of the most intractable problems in Byzantine numismatics has proven to be the light weight solidus struck at various times through the 6th and 7th century. The initial theory, that they were produced for trade beyond the borders of the empire, is simply a historical accident, based on the first hoards of these pieces being found outside the empire. There is no evidence that they did not circulate side by side with full weight solidi; on the other hand, there is no evidence to indicate what their purpose may have been. Their first appearance comes after the re-conquest of Italy by Justinian I, suggesting that there was some relationship with the western market, but there is no reason the west would require a separate weight standard, especially not as much as 150 years later under Justinian II. A satisfactory explanation remains to be found.

Artavasdus was an able general who rose to prominence under Leo III and earned the hand of the emperor's daughter Anna. In 742, a year after the death of Leo, he usurped the throne from his brother-in-law Constantine V. Artavasdus quickly raised his son Nicephorus to the rank of co-emperor, and most of the scant surviving coins from his reign feature a portrait of Nicephorus on the reverse. This exceptionally rare coin is from the usurper's first issue, before the elevation of Nicephorus, and features the canonical cross potent on three steps reverse. Artavasdus was an *iconodule* whose decision to restore the icons was well received by the populace. The reverse legend on this rare issue, IHSCS XRS TCS NICA, replaced the usual VICTORIA AVG4 legend found on previous solidi of this type, achieves a different religious tone than had appeared on the gold issues of Leo and Constantine, and may have been chosen to appease a frustrated church and citizenry.

EARLY MEDIEVAL & ISLAMIC COINAGE

EARLY GOTHS

The First Gothic Coinage

Faltin, "Taman Imitations - 'Coins of the Unknown People,'" *The Celator* 20, 7 (July 2006), pp. 22-6. VF, dark green patina, a little rough. Very rare. (\$200)

Ex Elsen 69 (16 March 2002), lot 66.

Although unrecognized in western numismatic literature, these coins have been studied by Russian and Ukrainian numismatists over the past century. The vast majority of the extant specimens have been found in the region of the Taman Peninsula, although some have been found throughout the Black Sea region and northern Caucasus. The context of their finds suggest they are datable from the mid-third to the early fourth centuries AD. Although other theories regarding their origin still persist, the consensus among Russian numismatists is that these coins were issued by the Goths. Most prominent among these numismatists is L.N. Kazamanova, who has produced the most detailed study of the coins to date. She has determined that the coinage began as imitations of Roman denarii, specifically those of Marcus Aurelius or Septimius Severus featuring Mars advancing right on the reverse (cf. RIC III, 326 [Marcus] and RIC IV 46 [Severus]). Over time the obverse portrait and reverse type became more degenerate, eventually resulting in types that no longer resemble the original prototype. In her survey of the coins, Kazamanova has divided them into three groups based on the level of degeneration of the types, as well as their silver content. The present coin is from the latest group, which are of highly-debased billon and the designs are far removed from their prototypes.

OSTROGOTHS

1901. Theoderic. 493-526. AV Tremissis (1.48 g, 6h). Rome mint. Struck in the name of Anastasius I, circa AD 493-518. The legend with PP typically occurs at the other Italian mints for this issue, but this specimen lacks the requisite subsidiary symbols that should be present for these mints. Also, the style is more similar to the issues attributed to Rome.

This intriguing issue is significant in that it copies solidus types on a tremissis flan.

MEROVINGIANS

Merovingian Solidus

1905. Marseille. Circa 600-620. AV Solidus of 21 Siliquae (3.85 g, 6h). Fourth phase, group 8 (pseudo-imperial coinage). Struck in the name of Maurice Tiberius. D N MAV • • CR PP AVC, pearl-diademed, draped, and cuirassed bust right / VICORI (wreath) A AVC[C]V, cross potent set on globe; M A flanking cross, X XI flanking globe; all within wreath; CONOB. NM Type 8-1A, 28; Rigold 58-70 var. (legends); Belfort 2456 var. (same); MEC 1, 403. EF, die break, a couple light scratches on reverse. Very rare. (\$10,000)

By the end of the sixth century AD, diplomatic ties between the Byzantine Empire and southern Gaul were reestablished after having lapsed a century earlier. The resumption of ties was marked by the introduction of Merovingian pseudo-imperial coinage during the final years of the reign of Justin II (574-578). At first these coins were struck on a limited scale and under strict control of a centralized minting authority, which supervised all the mints, legalized the reduced local standard, and possibly supplied the dies. By 580, however, this control broke down, and soon some mints began striking issues of clearly inferior style and often with illiterate legends. Elsewhere, while mints such as Arles might conform briefly to centralized standards, they too soon lapsed into striking more "localized" types.

During this period, only Marseille, by far the most active of the Gallic mints, as well as the only one to continue proclaiming loyalty to the Byzantine emperor, continued to remain under strict control, while it increased its output sharply by coining the heavy imperial subsidies flowing into the area in return for Frankish military assistance.

In the final years of the reign of Maurice Tiberius, and certainly by 596, Marseille, now the chief regional mint, reintroduced a small, more tightly controlled pseudo-imperial issue in the name of Maurice Tiberius, which the mint continued to strike after the emperor's death. Like those coins issued under Justin II, this new issue was more than likely a resurgence of the Byzantine contact with the area that had been allowed to lapse during the preceding years. Although, as before, the other regional mints, such as Uzès, Viviers, and Arles also briefly participated, they soon fell into obscurity, and Marseilles became the main southern Gallic mint.

Upon the death of Maurice Tiberius, Marseilles halfheartedly accepted the rule of Phocas. Although a very small and extremely rare issue was struck in the name of the new emperor, the mint preferred to continue striking the Maurice Tiberius type until the succession of Heraclius in 610, when it briefly struck coins commemorating his new rule. Subsequently, the Merovingian kings, at last able to exert their authority over southern Gaul, took over control of Marseilles and its mint and began striking issues in their own names.

WORLD COINAGE

The Early Dated Coins of Europe 1234-1500

An illustrated catalogue and guide to dated medieval coinage

The Early Dated Coins of Europe, 1234-1500, presents for the first time a comprehensive listing in chronological order, by region, state, and mint, of all the known types of gold, silver, and copper dated coins struck in medieval Europe with an Anno Domini date of 1500 or earlier. These 'early dated coins' form one of the first links between medieval and modern coinage. Anno Domini dating of coins using Latin script did not begin until the mid-13th century, and did not become prevalent in Europe until three centuries later. Separating those few coins with dates from the many struck without them at a thousand mints and by hundreds of different coin-issuing authorities was a daunting task.

This book expands on the only volume remotely comparable, the long out of print work authored by Albert Frey in 1915. It has taken Robert A. Levinson, a Los Angeles attorney and an ardent collector, more than fifteen years to bring this book to fruition. It has been accomplished in no small thanks to the cooperation of many of the world's foremost numismatists, coin dealers, and museums in more than half a dozen countries. A pastime begot a passion and the results are in these pages for all to see and benefit. The Early Dated Coins of Europe, 1234-1500, will be a standard reference for years to come.

The glossaries and appendices will be invaluable not only to collectors of 'early dated coins,' but also to anyone needing a quick reference to medieval coin-issuing cities, states, and mints, identifying their basic designs, or reading their sometimes complicated legends. Every numismatist will find the annotated bibliography a vital resource.

In 1447, when the ruling Visconti line died out, Milan declared itself a republic. Charles, the French Duke of Orleans and son of a Visconti, contested this and claimed title to the duchy. He died in 1465, ultimately unable to take control of Milan. Charles' son, King Louis XII, was more successful. He invaded Milan in 1499 with the help of Swiss mercenaries and succeeded in pushing out the ruling Sforza family, the dynasty that had taken control in 1450. Louis XII ruled the duchy of Milan until 1513, when the Swiss mercenaries – now allied with the Sforzas – forced him out. For several more decades, France and Milan remained embroiled in back-and-forth political battles, always with the involvement of several other nations.

Theriaca (also known as 'Venice triacle') was an ancient medicinal compound, employed as a traditional medicine since the time of Mithridates VI of Pontus, and was used as antidote against any poisonous bite. Nero's physician Andromachus, as well as the medical author Galen discussed its medicinal value. Containing more than 64 ingredients, including viper flesh and opium, as well as herbs, cinnamon, agarics, and gum arabic, it was mixed with honey and wine to complete the compounding process. During the Middle Ages, it was considered a panacea. Theriac became a valuable article of commerce, with Venice, Padua, Milan, Genoa, Bologna, Constantinople, and Cairo all competing in its trade. It was expensive and hence available only for the rich (quality theriac cost one German taler in 1580s). By the time of the Renaissance, the making of theriac had become an official public ceremony, especially in Italian cities. It is first mentioned in England in 1538, and it gained popularity in Germany around the same time. Pharmacists sold it as late as 1900.

Venice regulated the production and trade of theriac beginning in 1258, and by the fifteenth century controlled its distribution throughout Europe. About 40 pharmacy shops in Venice were officially allowed to produce and sell theriac. One of the most renowned factories was "La farmacia alla testa d'oro," which operated on the Rialto since 1565. The pharmacy kept detailed records on the amounts of its annual production. Curiously, this pharmacy still exists and operates in Venice.

The Orden Mercedaria, or the Order of the BVM of Mercy, was established in Spain in 1218 as an order whose purpose was to ransom Christian captives. In Spanish colonial America, the order became well-established, organizing numerous chapters, as well as involving itself in a variety of religious and secular organizations. As the wars of independence sought to throw off Spanish colonial rule, the Orden Mercedaria was deeply involved as well as deeply divided. In some areas, the order assisted the pro-independence movements with the distribution of funds. This coin, countermarked to designate it as having come from the order, may have been employed to "liberate" partisans of the movement who were being held in Spanish captivity.

Exceptional Cynethryth Penny

2123. Kings of Mercia. Cynethryth. Wife of Offa, 757-796. AR Penny (1.29 g, 6h). Canterbury mint. Light coinage; portrait type. Eoba, moneyer. Struck circa 780-792. E. \diamond B. A., draped bust right; trefoil at sides and above / + CFNEd.R.Fd. R.EGIN.A, barred M; five pellets around and within. Blunt 119; SCBI 16 (Norweb), 93 (same dies); BMC 61 (same obv. die); North 339; SCBC 909. EF, lightly toned, very minor edge porosity at 12h. An exceptional example of early Saxon portraiture. Extremely rare. (\$30,000)

From the Collection of Susan and Eddy Quinn.

Cynethryth, the wife of King Offa of Mercia, was the first and only Anglo-Saxon queen to have her name and image placed on coins. While it has been suggested that these coins were inspired by the appearance of the empress Irene on Byzantine issues, the profile portrait harks back to coinage of Roman *augustae*.

Many details of Cynethryth's life, such as the date of her marriage, are unknown. She appears to have been active in political affairs until Offa's death. After her husband's passing, she became abbess of the monastery of Cookham, where she remained until her death sometime after 798. Cynethryth appears in the hagiography of St. Aethelbert, where she is portrayed as a jealous villain who incites Offa to kill the saint.

This exceptional coin was found in September 2006 with four Offa coins of similar fabric in North Yorkshire and has been associated with a previous hoard discovered on the same site between 1991 and 1997. This piece was declared treasure trove and returned to the landowner. Copies of administrative paperwork relating to the find, as well as export documentation, are included in this lot. We would like to thank Susan Quinn for providing this background information.

Viking Issue in the Name of Alfred

- 2128. Danish East Anglia. Imitations of Alfred the Great.** Circa 885-915. AR Penny (1.58 g, 5h). Good VF, toned. (\$2000)

From the Ross Schraeder Collection.

Although East Anglia was not within the Mercian sphere of influence during Alfred's lifetime, his coinage was popular there and became the standard currency, which led to their being extensively imitated. Mark Blackburn in "The Ashdon (Essex) Hoard and the Currency of the Southern Danelaw in the Late Ninth Century," *BNJ* 59 (1989), pp. 13-18, gives three criteria for judging Viking imitations of Alfred's coins: light weight, anomalous style, and poor literacy, stating that if two of these conditions applied, one could be reasonably sure of an imitation. While the weight of the present coin is not an issue, the style and misspellings clearly mark it as being among the imitations.

The portrait on this example is a bit unusual compared to other examples of this type. As noted in North, p. 123, some of the coins of this (rare) moneyer are known to be 19th century forgeries. This coin, however, does not fit the diagnostic listed in Blunt and Thompson ("Forgery in the Anglo-Saxon Series," *BNJ* XXVIII [1955-7], pp. 18-25) for determining whether it is one of these forgeries.

A Unique Offering of Off-Metal Trial Strikes by the Forger Rosa

2194. GREEK. Reproductions. Rosa Off-Metal Trial Strikes. Peter J. Rosa was one of the most prolific forgers of the 20th century. He began collecting coins and metals at a young age, but, being of modest means, was unable to afford the high-quality ancient coins which he most desired. Rosa's interest in ancient coins stemmed from an appreciation for classical art that also developed during his youth. He soon discovered that although he could not obtain the coins themselves, he could afford to collect casts of such coins that were available from many museums at the time. While serving in the Merchant Marine after World War II, his numerous trips to London permitted him to obtain many casts of coins from the British Museum, and soon his collection of casts included examples of some of the finest known ancient coins. Desiring to utilize his growing collection of casts as both a business venture and a way to provide quality reproductions to the public, Rosa established the Becker Manufacturing Company in 1955, the name serving as an homage to the famous 18th century counterfeiter, Carl Wilhelm Becker. His business met with relative success, and by the late 1960s Rosa was reportedly selling about 200,000 replicas per year worldwide. This success did not go unnoticed by the numismatic community, and professional numismatists, dealers, and the press all condemned his business. Rosa's work was partly responsible for the introduction of the Hobby Protection Act, passed into law in 1973, which ultimately led to a curtailment of his production.

What is remarkable about Rosa was his resourcefulness in the manufacture of his reproductions. Operating out of his Bronx home, Rosa had no access to the essential products for making coins. Nonetheless, he made use of anything that he could find. Many of his dies were made from scrap metal, such as old lamps, which he found in his local junkyard. His flans were likewise rudimentary in their composition. For striking his coins, Rosa had no sophisticated machinery; he simply used an ordinary hydraulic automobile jack and his own strength. Perhaps just as impressive as his resourcefulness is the fact that Rosa had no formal training in metal work. Everything he did, he learned on-the-job, by trial-and-error.

After his death in 1990, Rosa's dies were acquired by Wayne Sayles and, in turn, presented to the ANS museum. The present lot consists of off-metal trial strikes from 33 of Rosa's dies for Greek coin (32 tetradrachms, 1 stater). Rosa's initial tests, or trial strikes, from new dies were usually done in lead. Once satisfied with a die's performance in lead, he would then perform trial strikes in harder metals. The trial strikes in this lot offer a representation of the various metals he used. Of particular note is one example, item B4d below, that typifies his resourcefulness, as it is struck from a 1975 Lincoln cent. While trial strikes from other famous modern forgers are quite abundant (e.g. numerous trial strikes from Carl Becker's dies were produced by the British Museum for some time), at most only a couple of each type exist for Rosa's dies. Not only do these trial strikes offer important insight to the production technique of a forger, they also offer tangible evidence for verifying part of Rosa's numerous forgeries.

The following is a list of the trial strikes in this lot, organized following Rosa's logical progression from softer (lead) to harder (tin) metals. All are referenced to their prototype (if known), and the catalog of Rosa Reproductions in Wayne Sayles' book, *Classical Deception*:
